### **DEDICATION**

This game is dedicated to the memory of Robert J. Blake, whom did so much to further the art and the fun of roleplaying. You will be sorely missed.

This is also dedicated to Daniel M. Lawrence, who brought this game to life for so many.

#### INTRODUCTION

**Adventure Quest**<sup>TM</sup> (**AQ** for short) is a role playing system in which you, through your game persona (adventurer), can experience all the thrills and perform deeds of derring-do in a fantasy world. It is like being the hero in an adventure novel, only, instead of just reading about what happens, your actions and decisions direct the storyline. You can destroy evil maidens, rescue fair dragons, or even be a knight in very dull armor. Your imagination is the only limit to what you can do while playing Adventure Quest.

As a player, you create an adventurer which you control. Another person, called the Game Master (GM), presents to you and other players a fantasy world of cities, towns, creatures, oppressive overlords, demanding temples, and lots of magic and treasure. You tackle adventures in this world to satisfy the personality and motives of your adventurer. Adventure Quest tm provides adventure in a variety of different settings (Games), each with its own history, customs, inhabitants, villains, and deities.

This Game covers adventuring in JAERN, a distant fantasy world far in our future. Other Adventure Quest games include AQ/BRITANNIA, describing a world similar to the British Isles in t he mid 1200's; AQ/KHEMET, providing adventure in a land akin to ancient Egypt; AQ/FREEZONE, a coorporate ruled gangland in the near future; and AQ/SPACE, for adventuring in the outer reaches of Interstellar Space among the Pan-Human Hegemony.

#### **Realism and Playability**

Adventure Quest/Jaern is a complete game; you do not have to buy any other books before beginning play. It contains all the necessary information for players to create and play their adventurers, and for Game Masters to design and maintain a campaign. Any game such as this must strike some kind of balance between realism and playability. The mechanics used in this manual lean heavily towards the latter, with the idea that you should spend your time roleplaying your creations, be you a player or Game Master, rather than wading through very complex rules for the sake of realism.

That said, we realize that some of you might be willing to make a different tradeoff. Where appropriate, optional rules are included offering different, but more complex, mechanics that arguably provide greater realism. The players and Game Master may choose which options to include to tailor the game to their liking. The cornerstone of **Adventure Quest<sup>TM</sup>** games are flexibility. Much of the game book deals with the creation of personalities, creatures, magical items, etc. Examples are provided that you can use as is, but more importantly we tell you how to create your own that will automatically be balanced with the system.

#### **About Role Playing**

Playing Adventure Quest, like any role playing game, should be a fun and exciting experience. Your adventurer will likely encounter many unusual, exotic, and strange situations, people, and activities. Your adventurer may end up in conflict with, or allied to, an array of intelligent beings and creatures, many of which we might consider strange or even evil by today's standard and mores. Please remember that this is "just a game." The authors in no way endorse or suggest that you act out any game-related actions or methods in the real world. Practice safe gaming, and leave the game and any enemies you make there behind you at the gaming table.

#### **How to Use this Book**

- All players and Game Masters should read Chapters 1 through 4 which deal with the creation and playing of adventurers.
- Chapters 5 through 10 describe the world of Jaern, the setting for this game, and is therefore also pertinent for both players and Game Masters.
- Chapters 11 through 27 present the magic available in AQ/Jaern.
  - Chapter 11 discusses nomadic mystiscism.
  - Chapters 12 through 16 deal with elemental magic, and are therfore of primary interest to players whose adventurers use magician spells.
  - Chapters 17 through 27 deal with divine magic. Each deity has its own chapter, so these are of interest to any
    player whose adventurer follows a particular god or goddess.
- Chapters 28 through 35 are meant primarily for the Game Master. They discuss creation of actors, creatures, and treasures, designing interesting and exciting adventures, adjudicating adventures, and how to maintain a campaign.

#### **Pronoun Gender**

Gender neutral pronouns are in use where applicable, updaing from the previous version's masculine pronoun usage.

#### **Updates Made in This Version**

The following are areas that I felt were either no longer in keeping with the world that I played, were wholely missing, or were conflicting within the text:

- 1. Slavery: In the original text, slavery is both depicted as a form of punishment (akin to an endentured labor) and as a chattel version of slavery in which slaves remain in servitude for life. Additionally, the original text includes statements both that children cannot be slaves and that they can be born into slavery. As slave labor was often relegated to the background of scenes when I played, I will be removing much of the supporting text for it and updating it to be more in line to be a limited time frame of endentured labor, with the punishment for crimes not being transferable to kin, save for the withholding of inheritance to cover debts.
- 2. Weapons: Many of the weapons seem to hold nonsensical values with regard to their (sparse) descriptions. I will be making efforts to update the weapon table to make sense.
- 3. Souls: Much of the writings of nomadic, divine, and elemental magic systems involve souls and those who have them. There are entire branches of necromancy devoted to it. However, there are odd gaps when it comes to elves. As a result, I have made a determination that spells and effects which remove or destroy a soul do not kill the target. Additionally, as there is some confusion on the difference between the mind/soul, specifically in regards to memory and personality, I have made the determination that those are part of the soul. This means that a being or creature who is able to move their soul to another body (which is without a soul) will possess all of their knowledge and skills, but is still bound by the physical characteristics of their new form (meaning they may be unable to wield a weapon they are proficient in or cast certain spells beyond their WIL).

#### **Original Acknowledgements**

The list below is really just the beginning. Many people have contributed in different ways at different stages of this project. We would especially like to thank Mark Shoemaker for lots of zany ideas and style over many years, Bob Ferguson for his devotion in filling out thousands of forms, to Scott Delaney for fixing all our cars, to Tony Charlesworth for his endless time researching a world full of information, to Greg Mowzko for not letting a single error problem by no matter how insufferable it was, to Microsoft for their Access product that holds all of our databases, and to our good roleplaying friends in Lake Geneva, for providing us the motivation.

Robert J. Blake, my coauthor of this system, created most of the elemental spells, a lot of creatures, many skill descriptions and provided a sounding board for all the basic concepts behind our system. He provided endless encouragement to bring this project to pass. Robert ran the AD&D Open Tournement at the Gencon Gaming convention for over a decade, overseeing uncountable details of scenario design and game master coordination. It was his experience which made it possible for us to create this system. Also our work on these concepts found its place in improving other systems in many ways. Sadly, we lost Robert at the beginning of the new millenium. He will be greatly missed.

# Chapter 1

# **Creating an Adventurer**

To play in **Adventure Quest** (**AQ** for short), you must first create an adventurer to control during the game. All adventurers start out as young persons just leaving home, seeking fame, fortune and yet more adventure. Keep track of your adventurer's attributes and skills by completing a 4x6 **adventurer card** like the empty one below; use a pencil for this, as frequent changes will be made during the adventurer's career.

Name: STR INT PER CSE HEA AGI PWR COM	( Background DP EU/DU Element Languages:	) Combat Missile Grapple Skills:	Mod / Defense / / / Equipment:	Rate Date Silver EXP Profession Enchanted Items:
Race Sex DoB Age Build Height Weight Eye Hair Motive Deity				

## 1.1 Random Numbers

When people are born, they do not get to choose to be male or female, tall or short, or clever or daft. To simulate this in AQ, these attributes (and other uncontrollable random events) are determined by rolling dice. Later, you may freely choose the skills, languages, etc. your adventurer learns as he grows.

Dice come in many different sizes, and when a die roll is required, the type and number are expressed like this:

("# of dice) d (sides of dice)

Thus, "3d6" means to roll three six-sided dice and add up the results of each die to get the total result. Always

assume six-sided dice if the number of sides per die is not specified.

## 1.2 Physical Statistics

Each adventurer has several attributes. The most important of these are the nine physical statistics or stats, which are listed at the top of the first column of the adventurer card. These stats normally have a rank or value between 0 and 24. These represent: **test1 test2** 

Strength	(STR)	Physical prowess		
Intelligence	(INT)	Reasoning and problem solving		
Perception	(PER)	Awareness of surrounding events		
Common	(CSE)	Sound practical judgement		
Sense				
Health	(HEA)	Physical well-being		
Agility	(AGI)	Physical coordination		
Power	(PWR)	Magical potential		
Comeliness	(COM)	Physical beauty		
Willpower	(WIL)	Mental strength		

Each stat is generated by totaling the roll of **3d6**, and thus ranges from 3 to 18. Roll **3d6** and write the total opposite STR on the card, roll again and write the total opposite INT, etc. until all stats have a value. Do not despair if they are not all high; playing an adventurer with both strong and weak points is much more fun and interesting than playing an omnipotent adventurer who never needs to think.

### 1.3 Placed Roll

After rolling the stats, you may change them somewhat to fit the kind of adventurer you wish to play. Roll **4d6** and throw any one die out, totaling the remaining three. Use this total to replace the value of any of your nine original stats. If the roll is unsatisfactory, ignore it and leave your stats unchanged.

#### 1.4 Race

Your adventurer may be one of five different races of intelligent creatures. Members of different races have differing physical appearances and abilities; see **Chapter 6:**Jaernian Humanoids on Page 41. Roll 1d20 and check on the following table to determine your adventurer's race.

Race Ro	II
Roll	Race
01 - 14	Human
15	Elf
16	Dwarf
17	Lizard
18	Orc
19 - 20	Half-breed

If the roll is 19 or 20 this means the adventurer's parents were of different races. Now roll to find the race of each parent. Each must be a different race, of course, so if the second parent roll is the same as the first, roll again until a different race is determined. The parents may be half-breeds themselves, which means that the adventurer's

grandparents must be determined the same way. If a half-breed grandparent is rolled, ignore it and roll again. Racial heritage determines which racial skills your adventurer has. Non-physical differences are represented as racial skills. For each list below in which your adventurer has a grandparent, roll 1d4 for each skill. If the number is equal to or less than the number of grandparents of that race, write that skill on the adventurer card. If your adventurer is purebred, (i.e., all four grandparents are the

same race) he automatically gets all that race's skills. Read the **Chapter 6: Jaernian Humanoids** to learn about these skills and racial disadvantages.

#### **Racial Traits** Elf **Dwarf** 1. Exceptional PER 1. Exceptional **HEA** 2. Distance Judgment 2. Material Sense 3. Missile Skill\* 3. Armor Construction\* 4. Soulless 4. Great Durability Orc Lizard 1. Exceptional WIL 1. Exceptional AGI 2. Enhanced Smell 2. Ouickness 3. Physical Viciousness\* 3. Water Breathing 4. Mental Stubbornness 4. Homing \*partial breeds check **Chapter 6: Jaernian Humanoids** to learn how to set these skills.

Elves are extremely long lived compared to the other races. The do not, however, posses a soul, and thus do not have an existence after death. This makes then unable to use divine magic, and unable to ever be brought back from the dead. Elves generally do not interact with the deities and their priests. Holy places like temples and shrines make them feel uncomfortable and they tend to avoid them. Full Humans are often more diverse and adaptable than other races. If your adventurer is a full bred human, you may take an additional Placed Roll to further customize your stats. Roll 4d6 and throw any one die out, totaling the remaining three. Use this total to again replace the value of any of your nine original stats. If the roll is unsatisfactory, ignore it and leave your stats unchanged.

## 1.5 Sex

Sex Roll					
1 - 3	Male				
4 - 6	Female				

Choose a sex for your adventurer, or roll 1d6 and check against the following table. You may additionally choose to play an intersex character, and you may also play your character as any gender of your choice.

## 1.6 Age

Age Die	
Race	Age Die
Orc	4
Human	6
Lizards	8
Dwarf	10
Elf	20

Determine how old your adventurer is at the start of his or her career by rolling one die of the appropriate type (from the following table) for each grandparent,

If your adventurer is pure human, obviously all four of his grandparents are human. Roll

and add 10 to the result.

**4d6**, total them and add 10 to find out his age. If, for example, he is half-elf, quarter-human and quarter-dwarf, roll 2d20 + 1d6 + 1d10 + 10. Aging is covered in detail in **Chapter 6: Jaernian Humanoids** on **Page 41**.

1.7. BODY BUILD 9

## 1.7 Body build

23	5'2"	62	75	90	108	130	157	189	228	46	7′1″	119	144	173	209	252	303	365	440
24	5'3"	64	77	93	112	135	162	196	236	47	7′2″	122	148	178	214	258	311	374	451
25	5'4"	66	80	96	116	139	168	202	243	48	7'3"	125	151	182	219	264	318	384	462
26	5'5"	68	82	99	119	144	173	209	251										

If your adventurer is not purebred, roll **1d4** to randomly select a grandparent's race. Now roll **1d20** to determine your adventurer's body build using the appropriate race column on the following table. If your adventurer is female, her body build is one category smaller than the chart result.

Вс	Body Build								
	Orc	Elf	Human	Dwarf	Lizard				
Α	-	-	-	-	-				
В	1	1-2	-	-	-				
С	2-5	3-6	1-2	=.	-				
D	6-16	7-14	3-6	1	1-2				
E	17-19	15-18	7-14	2-5	3-6				
F	20	19-20	15-18	6-16	7-14				
G	=.	-	19-20	17-19	15-18				
Н	-	-	-	20	19-20				

## 1.8 Height and Weight

Height and weight are determined by rolling 4d6 and totaling them. Add the number shown below for the race of each grandparent.

Racial Height				
Dwarves	+0			
Orcs	+2			
Humans	+4			
Elves	+5			
Lizards	+6			

## 1.9 Eye color

If your adventurer is not purebred, roll **1d4** to randomly select a grandparent's race. Now roll **1d20** to find your adventurer's eye color, using the appropriate race column on this table:

Eye Color								
Color	Human	Elf	Dwarf	Orc	Lizard			
Black	1	1-2	1-10	1-4	1-12			
Brown	2-8	_	11-18	5-6	-			
Blue	9-14	3-10	-	_	13-15			
Green	15-16	11-14	19-20	7-12	16			
Red	_	15-17	-	13-18	17-19			
Silver	_	18-19	-	_	20			
Hazel	17-20	_	-	19-20	-			
White	_	20	_	-	_			

## 1.10 Hair color

If your adventurer is not purebred, roll **1d4** to randomly select a grandparent's race. Now roll **1d20** to find your adventurer's hair color, using the appropriate race column on this table:

Hair Color								
Color	Human	Elf	Dwarf	Orc	Lizard			
Brown	1-7	-	1-10	1-2	_			
Black	8-11	1-6	11-16	3-16	-			
Blond	12-15	7-8	_	_	-			
Red	16-17	9-13	17	17-18	_			
Green	-	14-15	-	19	_			
Grey	18	-	18	_	_			
White	19	16-18	-	20	_			
None	20	-	19-20	-	1-20			
Silver	-	19-20	-	-	-			

## 1.11 Motivation

That takes care of the random elements of adventurer creation; now you have a free hand in developing your adventurer's inner-self. Evolving his personality takes some thought, but it is a rewarding aspect of role-playing. A good way to start is to create an event that occurred early in his life that now defines his basic motivation. Once you have a starting point it is easier to describe more about their personality.

Below are some possible motivations from which to choose, but you are free to make up others as best fits your needs and concepts. Now mentally describe an event or condition to explain why it is your adventurer's primary motivation. Write this motive down on the Adventurer Card after "Motive." Here are some suggestions:

Motivation	
Duty	Allegiance to a higher authority
Fame	Gaining recognition from others
Justice	Maintaining balance
Knowledge	Learning for learning's sake
Passion	Serving a cause with intense emotional
	fervor
Pleasure	Seeking pleasures of the flesh
Power	Forcing the submission of others
Religion	Devoting their life to a higher authority
Righteousness	Striving to help mankind
Romance	Earning the love and/or respect of oth-
	ers

The motive you choose is not meant to be a "straight jacket" to force you to play the adventurer within narrow bounds. It is meant to be used, by you, to help set a direction for your adventurer's actions and a start for his personality. You always have the freedom to write down what you believe is your adventurer's driving force on your card. Also realize that there is magic which can be used to determine your motive, and the results of this magic will be what is perceived by the GM as your motive, which may disagree with what you have written. To learn more about creating your adventurer's personality, read **Chapter 7:**Creating and Playing Actors to see how the GM creates personalities for actors. These methods are applicable to your adventurer's personality as well.

## 1.12 Patron Gods

You may select one deity as your adventurer's patron god. Adventurers aligning themselves to a deity this way are expected to assist the causes of the god, and especially to follow that god's precepts and laws. In return, they are often assisted by the priests and followers of that deity. Worshiping more than one god is possible, but can become difficult if the deities conflict in any way. Write down the name(s) of the deity(s) on the adventurer card after "Deity." Here is a list of available deities; each is covered in detail in its own chapter.

Patron Gods					
GOD	Sphere of Influence	Sex			
Ra	Bearer of Light	М			
Isis	Mistress of Life	F			
T'or	The Thunder of Righteousness	М			
At'ena	Mistress of Wisdom	F			
Osiris	Protector of Nature	F			
Tarus	Master Archivist	М			
Neptune	Dweller of the Waters	М			
Orus	The Flame of Zeal	М			
Anubis	Lord of the Dead	М			
Rudri	Dweller of the Dark	F			
Scrogg	Concubine and follower of Orus	М			

## 1.13 Adventurer Background

Backgrounds are the adventuring professions available in a specific AQ Game. Each Game has at least three major, divergent disciplines that may be followed, and thus gives three professions. Others are derived by combining two of the major disciplines to yield another, unique background. It may be helpful for you to visualize this as a three-spoke wheel, each spoke labeled with a major discipline. In AQ/Jaern these are Combat, Magic, and Skills.

The three backgrounds at the ends of the spokes are thus Warrior (for those exclusively trained in combat) Mages (Magic), and Augers (Skills). As for the areas between the spokes, a background that combines Magic and Combat produces the Priest, someone with a knowledge of Magic and the physical training to back it up. Combining Magic and skills yields a Nomad, with training in the mystical arts as well as skills. And finally, mixing Combat and Skills produces a Marine, a person with a need for fighting ability and quick and nimble movements.

1.14. LANGUAGES 11

Adventurer Background Stats							
Adventurer Background Most Important Stat							
Warrior	CSEand STR						
Priest	PWRand CSE						
Magician	PWRand INT						
Nomad PERand HEA							
Auger INTand CSE							
Marine	AGIand STR						

Each background has one or more stats that is very important to the successful practice of the profession, as given in the above table. If your adventurer's highest stat is STR, they probably would fare best as a Warrior. If they have a high PER, you probably should consider making them a Nomad, etc.

You must now choose an available background for your adventurer. Consider not only the stats, but also what you envision your persona becoming, or what you want to roleplay. You are not forced to pick the background that matches the highest stat. In fact, successfully role-playing (for example) an adventurer with a high STR and a mediocre INT as a Auger rather than a Warrior is very rewarding, not to mention entertaining, to you, the GM, and other players. Here are descriptions of the available backgrounds to further help you make a selection:

- A **Warrior** relies upon their skill at arms. They are proficient at fighting and confident in their ability to succeed with force. While they might serve in an army, a warrior prefers individual combat and is more likely found employed as a bodyguard, mercenary, constable, or a guard.
- A **Priest** is devoted to the service of a deity, forever at that deity's disposal to spread their faith and worship throughout the world. A priest is willing for fight for their deity's cause, but can also use god-given magical powers to further their goals.
- A **Magician** is a practitioner of one of four types of elemental magics, using his magics to affect the world and gain wealth, recognition and influence. A magician is often consulted and employed by others to accomplish their goals. The spells available in each element give a definite flavor to the personality and style of play of a magician. Fire and Air magicians tend to have more offensive spells, whereas Earth and Water mages are more defense oriented. Fire and Earth magic tends to be more individual in nature, while many Air and Water spells are useful to support and maintain a group of adventurers. If your adventurer is going to become a magician, bear these generalities in mind to select the elemental style that matches your adventurer's personality.
- Brought up learning to think to solve their problems, an **Auger** 's basic tenet is to live up to their potential, learning to utilize their best skills and making the most of any situation.
- Born to the seas, a **Marine** is a member of the traveling armies that plies the seas of Jaern. Ready with a quick story of marine heroes of the past, today's marine attempts to make a name for themselves and their shipmates. They adventure for fame, and are always ready for a good fight

and a large tankard of ale.

- Members of a tight-knit group of families, **Nomads** mistrust all other Jaernians and rarely travel among them. They are rumored to have various mystical and magical powers, so most people shun them, unsure of their intentions.

After choosing one of these, place it on the adventurer card after "Background." If you're still uncertain, scan the list of Model Adventurers beginning on Page 13 for ideas and suggestions. If it appears your adventurer suffers from hopelessly inadequate stats, they would probably not become an adventurer in a fantasy world. Ask the GM; they may allow you to discard this would-be adventurer and start over.

## 1.14 Languages

You need to know which **languages** (if any) your adventurer speaks to know how they can communicate with actors and other adventurers. Knowledge of languages is an intelligence-based skill, and beginning adventurers may know zero, one or two languages.

Learned Language						
INT	Initial #	Max #				
3 - 5	0	0				
6 - 8	1	1				
9 - 11	2	2				
12 - 14	2	3				
15 - 17	2	4				
18 - 20	2	5				
21 - 23	2	6				
24+	2	7				

Adventurers having an **INT**of less than 6 cannot speak coherently. They may know how to say isolated words or phrases, and can generally understand simple sentences. Playing adventurers with a low INT is very challenging because the player must communicate through actions rather than words.

The first language an adventurer with an INT greater than 6 learns is his racial language. This is Paroli for all human adventurers. Half-breed adventurers may pick one of their racial languages as their native tongue or the tongue of whomever raised him, whichever is most appropriate. The first language is always known at a skill rank of 9 or the adventurer's INT, whichever is lower.

With an INT above 8, the player may choose a second language. For non-human adventurers, it would be prudent to pick the common tongue of the area to simplify communications. This second language is initially known at a skill rank of 6.

The available languages are:

Language	s
Breziak Dwarvish Elvish Entish Ferric Geleik Haoogh Orcish Paroli Sel'ict	Human tongue Race tongue of dwarves Race tongue of most elves Spoken by intelligent forest creatures Human tongue Tongue of the elves of Silvan Isle Speech of the southern pirates Race tongue of orcs Race tongue for humans and common tongue Race tongue of the lizard men
Trejon	Ancient human tongue

## 1.15 Rating

Your GM must be able to balance your adventuring party against some opponents it might meet. Your adventurer's **Rating** is how many adventurers they have experienced. Set this at two now, and each time he finishes a gaming session, add one. A starting rating of two represents the skills that you choose in creating your adventurer. Your GM may ask for this number from all the players at the beginning of a gaming session.

### 1.16 Date

At the beginning and end of each adventure, the Game Master will tell you the current game date. The amount of time elapsed between adventures is important for curing damage, doing research, being pregnant, etc. The date is in ISO 8601 format (Year-Month-Day), such as 10080-06-15 SF (Since Founding). Record the current date minus your age on your card as your date of birth (DOB).

## 1.17 Nomadic Prefix Names

If your adventurer is a nomad, then they must know their own prefix name, or **Epokonom**. Roll **1d20** and look at the following table. Put this prefix before your adventurer's name.

Nomad Prefix Names						
Roll	Prefix	Roll	Prefix			
1-5	Raz-	16	Ald-			
6 - 9	Car-	17	Edo-			
10 - 12	Oka-	18	ljo-			
13 - 14	Vem-	19	Bez-			
15	Lar-	20	Sag-			

### 1.18 Name

Each adventurer must have a name of some sort. Choose a name for your adventurer and place it in the upper left-hand corner of the card. After this put your real name in parenthesis. This will help the Game Master to remember whose adventurer is whose.

## 1.19 Profession

Your adventurer may have a regular job to bring in a steady income. After your adventurer's skills are selected (see **Page 16**), you may choose one as their profession.

## 1.20 Adventurer Models

Players buy attributes for their adventurers using experience points. Physical equipment is bought with silver pieces. This buying allows you to make your adventurer's abilities fit your perception of her personality.

To simplify making a new adventurer, several different Model Adventurers are reproduced here. If you wish to pick one of these, just copy the information from the chosen model that matches your adventurer's background onto an adventurer card. For each defense value listed in the model, plug in the appropriate stats from your adventurer (dividing them by 5 and rounding down as shown) and add the results to find the your adventurer's defense values. If they are an elf, add one on their MDV for Exceptional PER. If they are an orc, add one to his GDV for Exceptional WIL. Your adventurer is ready to play.

Each model allows you 20% more attributes than if you had bought all the attributes separately. This extra does not make the adventurer more powerful; it is used to buy attributes that give added flavor and a direction for further development. Once selected, models cannot be modified or changed except to buy new attributes (or upgrade current ones) with earned experience points (see Buying on Page 13).

If none of the models fit your idea of your adventurer's personality, and your GM is allowing custom adventurer creation, skip this section and read Buying to learn how to complete your adventurer's creation.

Each adventurer prototype specifies the values for the following attributes:

1.21. EXPERIENCE POINTS 13

Model Attributes	
Damage Points (DP) Combat Modifier (CM)	Relative health Ability using hand-to-hand weapons
Missile Modifier (MM)	Ability using bows, slings and crossbows
Grapple Modifier (GM)	Ability to grapple
Spell type	Declared type of spells (EARTH, FIRE, AIR, WATER, and DIVINE)
Spell Group s	Ability to use various spell groups
Incants	Specific nomadic items and talisman
Skills	Purchased skills and their ranks
Combat Defense (CDV)	Resistance to being struck
Missile Defense (MDV)	Resistance to being hit by missiles
Grapple Defense (GDV)	Resistance to being grappled

### 1.20.1 Models

TBD

## 1.21 Experience Points

Experience Points (EP) are the currency used to buy such attributes as skills, stats, spells groups, damage points, and melee modifiers. Your adventurer is awarded EP during and after an adventure in several ways, depending on the method chosen by your GM. Using experience points in this way simulates any training or study that might be required to acquire or improve an ability without actually going through the tedium and boredom of doing so during a gaming session. By the way, when an adventure ends, don't forget to add one to the Rating entry on the adventurer's card. Your GM uses the Rating to get a rough idea of how much experience your adventurer has had so that they may balance the difficulty of an adventure against the power of the adventurers.

You may specify that a portion of the awarded experience be set aside and used later to buy attributes. There is no limit to the amount of experience your adventurer may hold, but it makes little sense to hold it longer than needed to buy the attributes sought.

## 1.22 Buying

If you have not chosen an Adventurer Model, your adventurer is given 5,000 EP with which to buy:

### **Things You Can Purchase With Experience**

STATS STR, INT, etc.

DAMAGE POINTS Ability to surv

DAMAGE POINTS Ability to survive injury
MELEE MODS Ability to resist physical damage

SPELLS Ability to resist physical damage SPELLS Magician and Priest magic

INCANTS Nomadic rituals

LANGUAGES Spoken languages

ABILITIES Useful skills and abilities

All buying must be done either when creating an adventurer or between adventures, and must be witnessed by the GM or their representative. The majority of the time this will be done when the adventurer has returned to a civilized setting, where the resources for training are most likely to be found. If an adventure is one in a series, and no game time has passed since the previous adventure, your GM may disallow buying attributes until after the entire sequence of adventures has been completed.

All attributes start at an initial rank of zero and may be bought upward one point at a time. To buy new attributes, or increase the value of an old one, multiply the base cost of the attribute by the point value you wish your adventurer to gain.

If Marna (a priestess of Osiris) attempts to raise her teaching skill (base cost 100 EP) from 8 to 9, she must expend 100 x 9 or 900 EP to do so.

If George the Magnificent (a Warrior) wants to raise his disguise attribute (base cost 50 EP) from 11 to 12, it will cost him 12 x 50 x 3 or 1800 EP. The 3x multiplier is included because the skill is an Auger skill, and George is a Warrior.

See Learning Skills on **Page 16** for more information on purchasing skills outside your class.

## 1.22.1 Buying up from zero

While attributes are usually bought one point at a time, sometimes it is necessary to buy one from zero up to a high value. To do this, we use a little bit of math . . .

To buy something from zero to an arbitrary value, call that

## **Attribute Purchase Equation**

value N.

$$TotalCost = \frac{N*(N+1)}{2} * BaseCost$$

For example, to buy damage points (base cost 25 EP) from zero up to 16 would cost as follows:

## **Attribute Purchase Example**

$$\frac{16*(16+1)}{2}*25 = \frac{16*17}{2}*25 = 3,400EP$$

If the formula above is too intimidating, use the following table. Cross reference your adventurer's current rank in the attribute against the desired rank, then multiply the number from the table by the base cost of the attribute to find the experience point cost.

Skill P	Skill Purchase Multiplier Reference																	
OLD NEW RANK																		
RANK	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
0	1	3	6	10	15	21	28	36	45	55	66	78	91	105	120	136	153	171
1	_	2	5	9	14	20	27	35	44	54	65	77	90	104	119	135	152	170
2	_	_	3	7	12	18	25	33	42	52	63	75	88	102	117	133	150	168

15	_	_	_	_	-	-	_	_	_	_	_	_	_	-	-	16	33	51
16	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	17	35

### **1.23** Stats

Of all the attributes, stats are arguably the most important. Stats are the basis for most resistance checks (the avoidance of effects), and determine the maximum value for most other attributes (skills, languages, spell groups, etc.). At a base cost of 500, they are also very expensive to increase. For example, to buy STR from 14 to 15 would cost  $500 \times 15 = 7,500$  experience points.

A physical stat may not be increased more than 4 above the initial roll, to reflect the notion that training and practice can only increase a physical ability so much.

## 1.24 Damage Points

Damage points (DP) indicate your adventurer's ability to avoid damage during combat. As you buy this total higher, your adventurer becomes more skillful at dodging, moving and twisting to avoid being damaged while fighting. If they are injured, damage points are temporarily subtracted from their total DP; the new total indicates their relative condition.

Lost DP may be regained by resting. A full night's rest (at least eight hours; twelve for those with no soul, like elves) restores a number of DP equal to the adventurer's HEA divided by five (by two for those with the **Exceptional HEA** attribute, like most dwarves), rounded down. Damage points may not be restored beyond the original maximum DP total.

The base cost for DPs is 25. Your adventurer must have DPs to survive, so here is a chart of the total cost of buying damage points up from zero.

Buying Damage Points								
DP	Cost	DP	Cost	DP	Cost			
1	25	8	900	15	3000			
2	75	9	1125	16	3400			
3	150	10	1375	17	3825			
4	250	11	1650	18	4275			
5	375	12	1950	19	4750			
6	525	13	2275	20	5250			
7	700	14	2625	21	5775			

Buying damage points with experience actually simulates additional training to avoid being wounded. This could be handled as another defensive modification, but being able to take more damage yields the same effect, is easier to keep track of, balances quite nicely, and is more fun to play.

When buying damage points, you are only increasing your adventurer's maximum DP, not their current DP total. New DPs are only gained after resting, according to the DP recovery rule above.

### 1.25 Melee Modifiers

Every adventurer has three modifiers, or Mods, that help determine success in combat. The **Combat Modifier (CM)** is added to all 1d20 "to strike" rolls you make when your adventurer attacks using a hand-to-hand weapon. The **Missile Modifier (MM)** is added to all "to hit" rolls from bows, crossbows and thrown objects. The **Grapple Modifier (GM)** is used when wrestling or boxing an opponent. Mods start at rank zero and are bought upward like any other attribute. The base cost depends on your adventurer's background:

1.26. SPELLS 15

Melee Modifier Costs									
Background Combat Missile Grapple									
Warrior	200	200	200						
Priest	300	300	400						
Mage	400	500	600						
Nomad	500	600	500						
Auger	400	400	400						
Marine	300	400	200						

Subtract the calculated **EP** from your adventurer's expendable EP total, then place the values for these on the **Adventurer Card** after **Combat, Missile**, and **Grapple**.

## 1.26 Spells

There is more to using magic in **AQ/Jaern** than is given here, but you need to understand experience point costs and stat limitations to decide whether your adventurer is suited to magic use. Spell casting mechanics are discussed in Chapter Playing an Adventurer, Page 21. Spells are of two varieties: Divine and Elemental. Divine magic is the magic used by priests, granted them by their deities. Elemental magic is used by magicians to harness the raw power of the elements. Both styles of magic are bought in similar ways. Adventurers buying elemental magic must declare which one of the four elements (Earth, Fire, Air, or Water) they will use as the source of their power. List this choice on the Adventurer Card under "Element." If an adventurer wants to purchase priestly magic, he must declare allegiance to a specific deity, who will serve as the source of his magic. This is listed on the card under "Deity" as the primary go or goddess to whom the adventurer owes allegiance. Spell effects for both elemental and divine magic are divided into groups. The spells in each group are related in some fashion, and are ranked in ascending order of power. Spells in a group must be acquired in ascending order, as the ability to cast the more powerful spells is built on the knowledge learned from casting the less powerful spells in the group. Elemental spells are divided into core spells, usable by all magicians, and element-specific spells that may only be used by the appropriate mages. Priestly spell groups are also divided into two types: core spells that are common to all devout casters, and deity-specific spell groups that manifest the particular sphere of influence of each deity. The base cost for each spell group varies and is listed in the spell descriptions. Most spell groups have a base cost of 300 EP; one spell group in each element has a base cost of 600 EP.

## 1.26.1 Acquiring Spells from Other Elements

Besides their chosen element, adventurers may purchase spells in the element they dominate at double the base cost. They may not purchase spells in any other element. Dominance is discussed in **Chapter 2**, but briefly Fire dominates Air, Air dominates Water, Water dominates Earth, and Earth dominates Fire. Thus an earth magician could also learn fire spells, but not air or water spells.

#### 1.26.2 Stat Limitations

Your adventurer's **INT**, divided by 2 and rounded down, dictates how many elemental spell groups he may buy; **CSE** is the limiter for divine magic. Thus if your adventurer has an INT of 12 and a CSE of 15, they may not buy into more than 12/2 or 6 elemental spell groups and 15/2=7.5 (round down to 7) divine spell groups. Your adventurer's **PWR** stat determines the highest rank that may be bought within any spell group, e.g., someone with a PWR of 13 may not buy above rank 13 in any spell group. Also, your adventurer may not buy a spell group's rank higher than it has listed spells.

## 1.26.3 Buying of Spells by Other Backgrounds

Normally only magician or priest adventurers buy spells, but those in other backgrounds may desire at some point in their careers to dabble in magic. Like any magician or priest they must choose an element and/or declare devotion to a deity. Spell groups are purchased at **triple** the base cost; buying into the subservient element costs **sextuple** the base cost.

Spell Cost Multiplier							
Buyer	Earth	Fire	Air	Water	Divine		
Earth	1	2	-	-	3		
Fire	-	1	2	-	3		
Air	-	-	1	2	3		
Water	2	-	-	1	3		
Div/Earth	3	6	-	-	1		
Div/Fire	-	3	6	-	1		
Div/Air	-	-	3	6	1		
Div/Water	6	-	-	3	1		
NM*/Earth	3	6	-	-	3		
NM*/Fire	-	3	6	=	3		
NM*/Air	-	-	3	6	3		
NM*/Water	6	-	-	3	3		

<sup>\*</sup>This also applies to a non-magician who picks up divine magic and then elemental magic as well.

#### 1.27 Incants

**Incants** are rituals performed by by nomads. These incants take the form of Alchemical mixtures, Songs, Talisman, Imprints (tattoos), and Spiritual Invocations. The ability to perform the ritual is purchased by the nomad by rank and at stated base cots. When the ritual is performed, many require a proper ingredient. An incant can not be purchased at a rank higher than half the adventurer's **PER** stat, rounded down.

### 1.27.1 Preparing Incants by Other Backgrounds

If an adventurer from another background wishes to delve into the arcane, they must seek out a nomadic **rondo**, renounce their allegiance to any gods, and be accepted by the nomads. They must be inducted into their ranks before they can learn any spiritual magic. They undergo **The Seraei** to find and bind with a **Guardian Spirit**. Even then, they must pay **triple** the normal experience cost since they have not yet learned the stories, songs an traditions of

those brought up within the rondo.

## 1.28 Languages

The key to increasing your adventurer's ability in a language is to find someone with a rank in that language at least four higher than the rank your adventurer wishes to obtain. He may buy the language skill to the desired rank at a base cost of 100 EP, besides the teacher's fee (monetary or service), if any. Remember that your adventurer's INT limits the number of languages they may learn (see Page 11). Furthermore, the rank of a language may never exceed the INT value. Language rank definitions are as follows:

Language Rank Definitions						
1-2	Knows individual words, no sentences					
3-4	Can speak common phrases					
5-6	Can be understood, but speaks w/accent					
7-8	Can hold conversations, read, and write					
9-10	Speaks like a native					
11-15	Can speak persuasively as an entertainer or politician					
16+	Can use speech as a weapon as a poet or bard					

## 1.29 Skills

Skills allow your adventurer to be more than their basic background permits. Each skill has a rank starting at one and going upward. An adventurer possessing a skill at rank 1 is complete novice at that skill, while holding a rank 18 shows an almost godlike command of the craft.

Skill Ra	Skill Rank Definitions				
1-2	Beginner				
3 - 4	Novice				
5-6	Apprentice				
7 - 8	Journeyman				
9 -10	Professional				
11-12	Craftsman				
13-15	Master				
16+	Guild-master				

## 1.29.1 Learning Skills

Skills may be taught by an actor, or by one adventurer to another. The teacher must rank at least four higher than the student's desired rank: the minimum learning time is one week times the skill rank the student is attempting to learn. The student must spend the required EP, plus a teacher's fee (monetary or service), if any. Each skill's associated stat governs the maximum rank your adventurer may purchase, e.g., INT based skills may not be bought higher than your adventurer's INT rank. On the next page is a listing of available skills. Those listed as "res" cannot be bought without consulting the GM. All the others can be bought by a beginning adventurer. The number listed in the "Extra Dice" column is the number of extra dice used to default that skill. Skills labeled with "non" cannot be defaulted. Full descriptions of each skill are in Chapter Skills beginning on Page 39.

## **1.30** Money

Each adventurer has a small initial supply of silver pieces to spend on equipment. If you did not pick an adventurer model, roll **3d6** and multiply the total by 10 to determine your adventurer's starting money.

## 1.31 Equipment

Silver is used to buy adventuring equipment. Items on the following table may be bought or sold when in a town and between adventures, without consulting the GM. Equipment may be sold back to the merchants in town for one half of the listed price. Place any equipment bought under "Equipment" on the **Adventurer Card** and subtract the proper amount of silver.

All prices are in silver. The exchange rate is 100 copper coins = 10 silver coins = 1 gold coin. Any item that is iron or steel may be silvered by quadrupling the cost. Items may also be made of other materials, if feasible.

Material cost multiplier chart					
Wood	1/2 Cost				
Iron	Base Cost				
Silver Plated	4 Times				
Solid Silver	10 Times				
Gold Plated	16 Times				
Platinum Plated	64 Times				
Solid Gold	100 Times				
Steel	200 Times				
Solid Platinum	1,000 Times				
Solid Adamantite	2,000 Times

### 1.32 Defense Values

Once your adventurer is equipped, you can calculate the three defense values, which determine how difficult it is to wound your adventurer in combat. There is a separate defense value for each type of melee: using hand-to-hand weapons (to strike), missiles (to hit), and grappling (to grapple). Add up the factors for each defensive component to calculate your adventurer's three defense values. They only need to be recalculated if any of the component values change. If the adventurer is bound or unconscious, skip the sections on Mobility, Agility, and Stat Modifiers. Set your adventurer's defense values at zero and start at the section on Armor.

## 1.32.1 Mobility

If your adventurer is standing and alert, they start each defense value with 3.

## 1.32.2 Agility

If your adventurer is alert and able to move, add 1 point to each defense value for each 5 points of AGI (rounded down) that your adventurer has. Add an additional one point to each defense value if your adventurer has **Exceptional AGI** (That is if they are a lizard).

#### 1.32.3 Stat Modifiers

Each defense value is dependent on one additional stat. Take the related stat for each defense value, divide it by five and round down. Add this to the appropriate defense value.

Melee D	efense St	tats
Combat	(CDV)	STR
Missile	(MDV)	PER
Grapple	(GDV)	WIL

Elves gain an additional one on their MDB for **Exceptional PER** and orcs one on their GDV for **Exceptional WIL**.

### 1.32.4 Armor

Different types of armor increase your adventurer's defense. Armor also determines how fast he can move each round during combat. Look up the type of armor they are wearing on the following table and add the modifier to each defense value:

Armor Defense and Movement						
Armor	Combat	Missile	Grapple	Move		
Naked	0	0	0	60'		
Clothed	1	1	1	50'		
Leather	2	2	2	40'		
Chain Mail	4	1	2	30'		
Steel Chain Mail	5	2	2	30'		
Plate Mail	6	4	2	20'		
Steel Plate	8	5	2	20'		

#### 1.32.5 Defensive Devices

Different kinds of shielding devices affect defense values. Of course, they must be worn or properly used to be effective.

Device Defensive Additions				
Device	Combat	Missile	Grapple	
Buckler	1	0	0	
Helmet	1	1	0	
Shield	3	3	1	
Steel Shield	4	3	1	

## 1.32.6 Weapons

Many weapons may be used defensively as well as offensively. If your adventurer is currently using such a weapon, look up its defense value adjustment on the **Weapon Information Table** chart on **Page 43** and add it to your **CDV** and your **GDV**.

# **Chapter 2**

# **Playing an Adventurer**

An **Adventure Quest** game session revolves about the interaction between you, other players, actors, and your **Game Master** as events unfold during play. This chapter presents the rules you and the GM need for a smooth running game. Once learned, you'll find them so simple and natural that they fade into the background, allowing everyone to immerse themselves in the excitement of the adventure without being distracted by constantly consulting tables and charts.

## 2.1 Your job as a player

You must bear one thought in mind when playing Adventure Quest: your GM has gone to much effort to learn and adjudicate the adventure. All their decisions are final and should not be challenged during the game. If you disagree with any of these decisions, take the GM aside **after** the game and talk it over. They may have acted on information you don't know, or slightly changed some rules to make the game different, more exciting, or less predictable. Your GM is under no obligation to explain any result, as the explanation could reveal information that your adventurer should not have.

## 2.2 Use of Dice

Dice with different numbers of sides are required to play AQ. At a minimum you'll need a dd, a d

Adopting these simple conventions will prevent confusion and misunderstandings about dice rolls:

- 1. Make sure someone witnesses all rolls.
- 2. Don't roll dice until the GM asks you.
- 3. If any dice fall off the rolling surface, reroll them all.
- For percentage rolls the darker die is always the ten's digit. If uncertain, verbally name the ten's die before rolling.

## 2.3 Playing Modes

Play occurs in one of three **modes**, which are mainly defined by their time-keeping requirements during play.

#### 2.3.1 Summarized Actions Mode

When adventurers must perform a series of mundane actions that are not pertinent to the plot or enjoyment of the adventure, the GM may simply state these things are occurring, thus briefly summarizing a long time passage. If a player feels it's important to clarify an action during this time, he should notify the GM to switch to Free Action Mode. Having conquered the evil Jhelonian prince and rescued the fair Felicia from his clutches, you and your companions procure passage back to your home city of Rougtero. Four uneventful days at sea do not prepare you for the large celebration that takes place when you step foot on the docks.

### 2.3.2 Free Actions Mode

For most of an adventure session you will play in near real time. The GM freely accepts actions stated by the players and gives the results of those actions. This mode of play is suspended only when the GM decides to summarize a long time period or when melee is initiated.

#### 2.3.3 Melee Actions Mode

When adventurers, creatures and actors come into conflict with each other, the GM places the game into melee mode. Time is broken down into 4 second combat rounds. Each round, the GM hands out information about the combat, asks for adventurer actions, and reports the results. This cycle is repeated until the melee ends, at which point the GM switches to Free Action Mode.

## 2.4 Encounters and Combat

When adventurers encounter an actor, a group of actors, or creatures, combat may be the only alternative. The GM accepts and resolves melee actions as follows:

#### 2.4.1 Distance

When the opportunity exists for adventurers to encounter other creatures or actors, your GM will determine at what distance you are from them. Your adventurer must have **Line of Sight**, i.e., an unobstructed viewing path, to see their opponents. Indoors or underground this generally means they must be in the same room or corridor. Outdoors, the prevailing light conditions, the type of plant life, and the general terrain are all factors that the GM must considered.

#### 2.4.2 Order of Melee

A **Round** is an exchange of blows between two or more opponents. A round lasts **4 seconds** (15 rounds per minute) and is the time unit of combat. The following Order of Actions imposes order on an inherently chaotic situation:

- 1. Determine initiative.
- 2. Each group, in order of initiative, gets an Action Phase.
  - (a) Informational questions
  - (b) Action preparation
  - (c) Statement of actions
  - (d) Results of actions
- 3. Outcome Phase

#### **2.4.2.1** Initiative

Initiative indicates the order in which each side plans and performs its actions. A representative from each group rolls **2d6** and the results determine the order, highest to lowest, in which actions are taken. There is no simultaneous combat. If players are involved in one group, they win ties. Otherwise if a tie results, each side must roll again until one wins.

For each **Round** a side does not win initiative, it gets to add a cumulative **+1** to its roll for each succeeding roll. When a side wins initiative, it gets no such bonus the next round.

There may be more than two groups of initiative, in which case the rounds occur in descending order of initiative. Additionally, groups may merge or split during combat (i.e. a character is revealed to be an impostor or attacks an innocent bystander). Any changes to initiative groups take effect on the next round.

#### 2.4.2.2 Informational Questions

The GM starts the adventurers' action phase by taking questions from the players about the current situation and answering them according to the adventurers' knowledge at the time. Players may talk with each other about the situation, about playing style and rules questions, but MAY NOT tell each other what they plan to do or exchange

information between adventurers. When all questions have been answered, the GM continues.

#### 2.4.2.3 Action Preparation

The GM asks all players to prepare actions. Each player must decide what one action their adventurer will do during the upcoming round. Players MAY NOT talk with each other during this time. If play becomes very intense or important, the GM may ask for actions in writing. When all actions are ready, play continues.

#### 2.4.2.4 Statement of Actions

One at a time, the GM asks each player what their adventurer's action is for the round. Since these actions are occurring simultaneously, the order of the call is unimportant. As each action is revealed, the GM asks the player to make any needed rolls. The player should roll the requested dice and announce the results (including any modifiers). The GM records any results during this phase.

#### 2.4.2.5 Results of Actions

After all actions have been stated and resolved, the GM announces the results of the Action Phase. This includes creatures or people falling to the ground, incidental movement, noise, or visions. The players may ask questions here if the results are unclear. (Remember, sometimes this is intentional and the GM may refuse to answer!)

#### 2.4.2.6 Outcome Phase

After all combatants have had their Action Phase, the GM also announces the outcome of any occurrences that are not the direct result of adventurers, actors, or creatures involved in the combat. This includes things like large falling objects, timed explosions, natural disasters, collapsing buildings and disintegrating planets.

### 2.4.3 Surprise

When two groups of adventures, actors or creatures first meet, one group may not notice the other immediately. If this is true, and the non-surprised group attempts a combat action, the GM will change to Free Action mode allow them a Free Round to perform actions. The GM will continue to allow the Free Rounds until the other party notices their presence. Then the GM will start normal combat.

## 2.5 Actions

Of course, there are many different actions an adventurer may take during a round, but usually they fall into a few different classes. Each of these is described below to give you an idea of what your adventurer may do during melee.

#### 2.5.1 Movement

It is often necessary to maneuver during combat. Each adventurer has a Movement Rate that is the distance they may move in a round when not in direct melee. This distance may be modified by your GM according to terrain, obstacles, or circumstances.

If you wish to make any attacks or cast spells, you can only move 1/4 your movement rate that round. You can ready weapons, talk, observe the situation or ready actions while moving.

Armor Move Restrictions					
Armor	Move Rate				
Naked	60'				
Robes	50'				
Leather armor	40'				
Chain armor	30'				
Plate mail	20'				

## 2.5.2 Striking

When two opponents are within 5 feet of each other, they are normally considered "in melee," trading attacks with intent to harm. To determine if a hand-to-hand attack is successful, the attacker rolls 1d20, adds their Combat Modifier (CM), plus any other appropriate bonuses, to the result, and compares the total to the Combat Defense Value (CDV) of the opponent. The total must equal or exceed the opponent's CDV to hit.

Valken the Warrior attacks a poor, helpless villager with his once enchanted (+1) long sword. Valken's player rolls a 10 on 1d20. Valken's CM is 1, and the magical sword has a bonus of 1, for a total of 10+1+1 = 12. The poor villager is lying supine on the ground (with Valken's foot on his stomach), so it has a CDV of 5. Valken's player announces he has struck CDV 12. Since 12 is greater than 5, Valken strikes the orc with his long sword. The GM tells Valken's player that he has struck and directs him to roll damage. The player rolls 1d10 (for long sword damage), getting a 5. He adds 1 (for the magic sword) and announces that Valken has done 6 points of damage. At the end of the round, since the poor villager only started with 4 DP, the GM announces the he is slain.

#### 2.5.2.1 Impaling

Impaling our opponent with your weapon is a style of attack that uses the same attack roll and defense value as striking, but can cause considerably more damage. Charging an opponent with a set weapon or setting a weapon and allowing an opponent to run themselves through are both examples of impaling. Impaling is only effective when the target or the impaler have been moving at their maximum movement rate for at least one full round and the other is stationary or moving closer. Impaling is accomplished with standard roll to strike, but modifiers and skills are not applicable.

### **2.5.3** Hitting

Missile weapons are used very much like hand-to-hand weapons, except you use the attacker's Missile Modifier (MM) and the defender's Missile Defense Value (MDV). If the attacker's <a href="1d20">1d20</a> roll plus their MM, plus other bonuses equal or exceeds the defender's MDV, they have hit and the

player rolls missile damage.

## 2.5.4 Critical Hits and Misses

When your adventurer is attempting to attack in any way, examine the result of the attack roll before any bonuses or mods are added. If the die roll is **one**, it is an **automatic miss**, no hit happens, no grapple succeeds, no damage is done. If the die roll is **twenty**, it is considered a **Critical Hit**. The GM will ask you to roll percentiles (2d10 with one die specified as the tens' digit and one die as the ones' digit) to determine its severity. You can cross reference the appropriate table for your attack type in **Appendix A on Page 43** 

## 2.5.5 Grappling

Whenever an adventurer is within melee range of an opponent, they may attempt to grapple rather than strike at the opponent with a weapon. The adventurer must drop anything they are holding at the beginning of the round so that both hands are free. Shields take a full round to drop, your adventurer's arm is in a couple of straps.

The player states which grappling option will be used (hold or throw), then rolls 1d20 and adds the adventurer's Grapple Modifier (GM). If the total is equal to or greater than the opponent's Grapple Defense Value (GDV), the grapple option succeeds, the defender is held, or thrown. If the grapple fails the attacker and defender are still grappling, and must wait until the next round for another attempt.

All this happens during the attacker's portion of the round, so the defender may become the attacker in his portion of the round. Once an adventurer is grappling he may not withdraw unless he is not held, and has the initiative.

#### 2.5.5.1 Hold

The only action a held person may take is to attempt to break the hold. During their round, the held combatant may make a **4d6** check vs. **STR**. Each additional person holding the combatant adds **1d6** to this STR check. If the check succeeds, they has broken the attacker's grasp and may take other actions in their latter rounds. If it fails, every subsequent attempt is made adding an additional die to the STR check.

#### 2.5.5.2 Throw

When a throw attempt succeeds, the thrower may determine the direction of the throw. However, the distance thrown and what, if any, damage or other results occur must be adjudicated by the GM at the time of the throw.

## 2.5.6 Withdrawal from Melee and Grappling

To successfully withdraw from melee, the adventurer must not be held when it is his round to take an action. It will take one round to get up from the ground, so their opponent may have further opportunities to grapple before they can escape. Even if an adventurer has got up and run from a grapple, their opponent is free to chase and tackle them.

## 2.5.7 Multiple Combatants

Situations occur where more than one person wants to strike or grapple the same target. If the target and the attackers are relatively the same size, no more than four may attack the same target. A standing target backed up against a wall may only be attacked by two combatants; if in a doorway or tight corridor, only one. If more than the allowed number attempt to attack a single target, all attackers must make a check of 3d6, plus 1d6 for each extra attacker, vs. their AGI or trip and fall to the floor, losing their attack that round.

A possible exception to this might arise if adventurers behind the attackers want to thrust polearms or spears at the target between the attackers. This might be perfectly feasible; it is up the GM to decide based on the circumstances.

## 2.5.8 Shooting into Melee

Shooting a missile weapon at an opponent who is in melee with adventurers from your party is a dangerous and possibly fatal action. If you attempt to hit an opponent in melee, and miss, the GM will determine if any others in the combat are potential targets. If so, they will ask you to roll to hit the alternate target, damaging them if you succeed. Shooting your friends in the back is a sure way to earn a quick and violent death.

#### 2.5.9 Other Common Actions

It is impossible to list all the actions that might occur during an Action Phase. During play, the GM must adjudicate any unusual actions and assign duration for them. Some common actions and their duration in rounds are given below:

Common Action Duration	
Common Action Duration  Action Climb 10' of rope Dropping a shield Finding something in backpack Getting up from the ground Lighting a torch Mount a horse or dolphin Readying weapon Remove chain armor Remove leather armor Remove plate armor Removing backpack Searching a body	Duration 2 1 1-4 1 2-10 2 1 4 2 8 1 5-20
Survey a situation Switching weapons	1

## 2.6 Using Skills

When your adventurer must perform a specific task during play, success or failure is determined by a skill check or a stat check. Having an applicable skill gives them a better chance of succeeding, and the higher the skill value, the greater the chance for success.

To check skill use, your Game Master will ask you to roll some **d6**. If you roll **your adventurer's skill value or less**, they have successfully applied that skill.

Simple tasks require a roll equal to or below your adventurer's skill value on 1d6; moderately difficult tasks require a roll of 2d6, and very difficult tasks 3d6 or more. Remember, your GM is the final authority on needed rolls and can and will apply appropriate modifiers.

## 2.7 Defaulting a skill

If your adventurer attempts to use a skill they don't have, or fails at an acquired skill, they may still try, but the check is against that skill's associated stat, this is called **defaulting**. The total number of **d6** to be rolled is that given by the GM, plus the number of dice shown as extra dice for that skill. Restricted skills are so complex that aside from the fact that they must be purchased from the GM, they also may not be attempted by those who have not been taught the skill. Also some skills are based on acquired knowledge, and can not be defaulted. An entry of "res" or "non" in the extra dice column indicates that skill can not be defaulted.

Alene has bought mountain climbing up to rank 8, and has an AGI of 15. While adventuring she must climb a steep rock face. The rock is damp from rain and somewhat slippery, so the GM asks Alene's player to roll 8 or less on 2d6. The player rolls a 7, so the skill check succeeds.

Let's say the player rolled a 10, meaning the skill check failed. The GM allows another chance, using mountain climbing's associated stat (AGI). The player must roll Alene's AGI or less on 4d6 (the 2 dictated by the GM, plus 2 from the extra dice column opposite mountain climbing). The result is a 12, meaning success this time.

### 2.8 Resistance Checks

Resistance Checks (or RC) are a measure of your adventurer's resistance to physical and spell effects. When you are subject to such an effect, your GM will state what the effect is, which stat to check against, and how strong the effect is by announcing how many dice you need to roll to resist that effect. Roll that many dice, and if you roll equal to or lower than your rank in the appropriate stat, you succeed the resistance check and the effect is weakened or negated.

### 2.8.1 Armor Effects of Resistance Checks

Different types of armor can diminish your ability to resist certain magical and physical effects. Leather armor restricts mobility, automatically adding 1d6 to any RC (Resistance Check) against AGI. Chain mail has, in addition, a large mass of metal that attracts magical energies. An adventurer in chain must add 1d6 to any RC against AGI and PWR. A set of plate mail is extremely heavy and takes considerable strength to wear. An adventurer in plate mail must add 1d6 to any RC against AGI, PWR, or STR.

## 2.9 Dying and Falling Unconscious

If you fight you just might get hurt! When an adventurer is damaged they must temporarily subtract that number of damage points from his damage point total. If the total goes below zero, the adventurer dies immediately. (Since all actions are simultaneous in an action phase, a cure in the same round may prevent the total from going below zero). If an adventurer's DP total is between 0 and 5, the player must roll their adventurer's current DP total (after damage) or less on 1d6 to remain conscious. If they fail this roll, the adventurer immediately falls unconscious. When (and if) an unconscious adventurer recovers damage points through natural or magical healing, they may reroll to wake up. (This is automatic once 6 DP is reached).

## 2.10 Stressing Stats

If desired, adventurers can push themselves beyond the normal limits of their stats by **stressing**. This means that one point of the stressed stat is expended **permanently** to gain some effect. A single stat may not be stressed more than once in a melee, and two stats may not be stressed at the same time. Stressing may be done in any playing mode, but occurs most often during melee and doesn't count as an action. Though the stressed stat can never recover naturally, it can be bought back to its previous rank, or beyond, by spending experience points.

Stressing can not be used for any skill checks. Even though defaulted skills are rolled against a stat, this is not considered a stat check for the sake of stressing. A defaulted skill roll is a skill attempted without the proper training or knowledge, so no amount of stressing will improve your adventurer's chance of success.

To stress a stat, state to the GM at the beginning of your action which stat your adventurer is stressing. Some stats may be stressed in response to the GM asking for an RC. This table summarizes the results of stressing.

Effec	ts of Stre	ssing	
Stat	Resist Bonus	Spell Units	Other Effects
STR	2d6		+10 Strike +10 Damage
INT	2d6		
PER	2d6		
CSE			1 extra DI die
HEA	2d6	+2 rank/ incant	stay conscious
AGI	2d6		
PWR	2d6	4 EU or 4 DU	
СОМ			NOTHING
WIL	2d6		

A few of the entries in this table deserve some more

explanation.

## 2.10.1 Strength

Stressing **STR** during a combat round means your adventurer is making a heroic effort against their opponent. They gain a +10 modifier to his "to strike" roll and, if they strike successfully, inflicts an additional 10 damage points on their target.

#### 2.10.2 Common Sense

When a priest feels deserted by their deity during desperate times, they may elect to set common sense aside and put their faith in being delivered from their predicament by their god. Stressing a point of **CSE** gives them one extra die when calling forth intervention from their deity. No other background gains this ability.

#### 2.10.3 Power

Caught in a deadly situation, a caster may stress one point of **PWR** to regain 4 lost units, which must be used in the same round of the stress. These units can be elemental or divine units.

#### 2.10.4 Health

When near death, the slightest damage can cause your adventurer to black out, leaving them at their opponent's mercy. By an enormous effort of will, they can stay conscious, but this places their body and health at great risk. Stressing one point of **HEA** allows the adventurer to automatically succeed one unconsciousness check.

Nomads may stress one point of health to add two ranks to any one incant which they are preparing. They can only do this once per day.

### 2.10.5 Comeliness

Unfortunately, physical attractiveness is not something that can be improved in times of stress. If anything, the opposite is likely to occur. Stressing your adventurer's **COM** doesn't result in any perceptible boon, and may actually make the adventurer seem more frantic to his companions.

## 2.11 Weapons and Their Effects

Adventurers may employ many different weapons in combat. Each weapon is unique in the amount of damage it can do and who may use it. **Weapon Type** is the broad classification of each weapon as Edged, Pointed, Blunt, or Defensive. If a critical hit is rolled, these tell you which Critical Hit Table to consult. No criticals are possible with a defensive device.

STR is the minimum STR value required to effectively use the weapon. **DV** column is the Defensive Value adjustment for that particular weapon; this value is added to the adventurer's **CDV** and **GDV** when that weapon is in use. Note that one-handed weapons are worth 1 DV, two-handed weapons are worth 2 DV, and most defensive weapons are worth 3 DV. Two-handed weapons (those listed with a DV of 2) must be used two-handed.

The value in the **Use Rate** column specifies how many rounds are needed to use and then ready a weapon, already in hand, for another attack. **Strike Damage** is the damage inflicted on a successful "to strike" roll. **Thrown Damage** is the damage done on a successful "to hit" roll, or when a weapon is hurled by hand. **Impale Damage** is the damage potential if the weapon is set and braced against a charge, a falling body, etc. **Max Range** is the distance, in feet, that the weapon can be fired or hurled.

Weapon Effects								
Weapon	Туре	STR	DV	Use Rate	Strike	Thrown	Range	Impale
Unarmed	В	4	Χ	1	1d2	Χ	Χ	Χ
Battle Axe	Е	12	2	1	1d12	1d4	10	Χ

Whip	В	8	1	2	1d6	Х	Χ	X

E=Edged, B=Blunt, P=Pointed, D=Defensive

## 2.12 Weapon Specialization Skills

You may increase your adventurer's ability to use specific weapons by buying the appropriate weapon specialization skill. You buy this skill separately for each weapon you wish to specialize in. Skill in any weapon gives you additional options during combat for multiple attacks, better accuracy, higher damage and ability to get difficult shots with missile weapons. These abilities are given in detail under the entries for **Combat Weapon Skill** and **Missile Weapon Skill** in the list of skills in the next chapter.

## 2.13 Using Magic

There are two broad classes of magic: elemental and divine. Elemental power is derived from the four elements present in the physical environment: Earth, Fire, Air, and Water. The adventurer chooses one element in which to specialize and serves as a conduit for the power of that element. Magical effects are manifested by calling forth, manipulating, and controlling raw elemental power. The caster's expertise in their craft is measured in **Elemental Units (EU)**.

Each time a caster buys a rank in a spell group, they gains one Elemental Unit (EU). This power may be applied to any Spell Group the caster has purchased the knowledge to use; it is not limited to any specific spell group. Thus a caster who has purchased up through the third rank spells in five spell groups has 15 EU, and may use them to cast any spell they have acquired, even the same spell requiring three EU five times. Elemental Unit and Divine Unit totals must be kept separate as elemental power cannot activate divine spells and vice versa.

Divine magical power derives directly from the Jaernian deities. The adventurer is beholden to a specific deity and must perform the duties of their office and serve the cause of their god to receive the power to invoke magical effects. Priests perform their magical effects by manipulating the divine power granted them by their gods. Their mastery of their calling is also measured in **Divine Units (DU)**.

## 2.13.1 Casting and Terminating Skills

To use a spell, declare to the GM which spell your adventurer intends to cast. Your adventurer then begins to gesture, with a single hand if the casting time of the spell is a single round, or both hands for longer spells. They also speak out the key word or words that activate the spell. Any spell may be terminated by the caster before the normal end of its duration by expending one unit. This counts as the adventurer's action for the round.

## 2.13.2 Recovering Elemental and Divine Units

When a spell is cast, the required units are temporarily deducted from the caster's total. Expended units may be recovered by resting. These units regenerate at a rate of the caster's **PWR** stat in units for each eight hours rest. For example, a caster with a PWR of 13 recovers units at the rate of 13 units/8 hours rest (12 hours for an elf). Divine and elemental unit totals are kept separate, and an adventurer recovers their PWR in units for both types if they have purchased both styles of magic. Priests of Ra and Rudri recover spells in unusual ways, look at the section on your deity for details.

## 2.13.3 Restrictions on Spell Casting

If your adventurer's hands are damaged or restricted, they may be prevented from casting spells. One impaired hand prevents casting any spell with a casting time greater than one round; two impaired hands prevents any casting. A damaged or non-functional voice also prevents casting, but a magical silence does **not**, as the vocal component of a spell is more a concentration device than a method of summoning magical power.

If a spell caster has the **One-Hand Casting** skill, they can cast spells longer than one round by making a check. **Non-verbal casting** allows a caster to cast spells without using their voice. See **Chapter 4: Skills on page 39** for more information.

The properties of the metal Terisium, consume spell energy. If a caster is encircled by this metal, their current EU and DU totals eventually drops to zero; the adventurer may recover the units, by resting, once the metal is removed. **Prisoners** capable of spell-casting are often made to wear manacles, collars, and leg irons.

#### 2.13.4 Spell Interruption

All spells have a fixed casting time. If your adventurer begins a spell and then becomes the target of an attack before the spell is completed, the spell is ruined and they lose the units put into the spell. Spells with a one round casting time may not be interrupted, except by your adventurer's companions. Of course, if a fellow adventurer disrupts the spell, they may no longer be a friend.

#### 2.13.5 Spell Duration

Once a spell has been cast and is active, the caster only needs to concentrate on it when they desires to change the spell effect. For example, an **Arise** spell requires no concentration to hover, but does to lower or raise the target. A **Fly** spell requires no concentration to move straight at a constant velocity, but does to turn, slow down, or speed up. A conjuration takes no concentration to maintain, but the caster must concentrate on it to make any changes within the conjuration.

Concentrating on the spell restricts the caster's actions to a slow walk (1/5 normal movement rate) for any non-movement spell, and the appropriate movement for movement spells. Also they must maintain line-of-sight

(**LOS**) on the spell effect to be changed. The caster may not speak, nor perform other actions while concentrating.

## 2.13.6 Stressing PWR for Units

An adventurer may sacrifice one point of **PWR** for eight EUs or DUs by stressing the stat. This may be done at any time and does not count as an action. The caster may use these newly acquired units as they sees fit. The experience cost to replace a point of PWR is quite high, so this is not an action to be taken lightly.

### 2.13.7 Overloading the Spell Group

Normally you state your adventurer is casting an acquired spell, expend the necessary unit (deducting them from their current total), and the spell effect is adjudicated by the GM. If the caster lacks the required number of units, the spell may not be cast as they lose all remaining units. However, there are instances where an adventurer can stretch their ability to (and beyond) the limit.

This happens when the total cost of a spell is higher than the caster's rank in a spell group, and they have sufficient units to cast that spell. The caster is extrapolating their knowledge of the gestures and control that may be required by trying to skip one or more necessary steps (spells) in the training process. The adventurer may cast spells above what is allowed normally by overloading. They may not cast any spell 7 or more ranks higher than their highest purchased rank in the spell group; attempting to do so only drains their unit total to zero and no spell effect occurs. Nor may the attempted spell rank be higher than the caster's PWR stat.

If the overload attempt is from 1 to 6 ranks above the caster's highest purchased rank, the attempted spell may work, but other effects are possible considering the uncertainties of the power involved. The required units are deducted from the caster's total despite what happens. Subtract the caster's rank in the spell group from the rank of the attempted spell and add 6 to the result. This is the number the player must roll or exceed on 2d6 for the overload to work.

The spell fails if the roll comes up short; check the roll against the Overload Table for additional effects. The table only goes up to 11 because if the required roll is 12 and a 12 is rolled, the overload is successful.

2.13. USING MAGIC 29

#### **Overloading Effect Table**

Roll	Effect
2	caster suffers (units)d4 DP
3	caster drained of all remaining units
4	random spell (from ANY group) falls on caster
5	caster looses consciousness for 1d4 hours
6	caster suffers 1d10 DP
7	no other effects
8	lose one rank in spell group
9	lose two ranks in spell group
10	lose one INT/CSE point permanently
11	lose two INT/CSE points permanently
	(INT for elemental/CSE for divine)

Malvern has bought up to rank four in the Fire Magics group, but wishes to cast the eighth ranked spell, Fireball. He expends 8 EU to cast the spell, and the player must roll a 10 or higher (8-4+6=10) on 2d6 for the Fireball to succeed. The roll comes up as 11, meaning the Fireball functions as normal.

Gondo has bought up to sixth rank in the Water Magics group, but wants to cast Ocean Cold, the twelfth ranked spell. He expends 12 EU and needs to roll a 12 (12-6+6=12) on 2d6 for the overload to work. Unfortunately, he rolls an 11, meaning that the spell fails, and he loses two points of INT. He may buy his INT back, but it cannot regenerate on its own. One must be cautious when using spells.

## 2.13.8 Finessing Spells

The spells any caster learns have been developed over centuries of trial and much error. What has been learned is that when "x" amount of power is called forth and, through specific gestures and words manipulated in such a way, a certain effect happens. Magic is thus more an art than a science due to the vagaries of the raw power, elemental or divine, with which the caster must work.

This is not to say that experimentation is dead; on the contrary, most spells were serendipitously discovered when magicians and priests attempted to refine, or **finesse**, a known spell effect by judiciously applying a little more power to alter the range, duration, area of effect, or the effect itself. The EU or DU cost required to alter a spell component is always one, and no spell or spell component may be finessed more than four times. The sum of the spell rank and the finesses may not exceed the caster's **PWR** stat.

Finessable parameters within the spell descriptions are denoted by giving their values in two parts. The first part is the base number, followed by a plus sign, and then the amount that the base number may be modified by each finesse. For example, the area of effect of a spell could be given as **20 + 10/F' radius**. This means the spell normally occupies a 20 foot radius sphere, but each finesse can add or subtract up to 10 feet to this radius. No number may be modified to less than zero by finessing.

To determine if the finesse is successful, add one unit for each spell parameter the caster wishes to alter to the base

cost of the spell. If the total cost does not exceed the caster's rank in that spell group, the finesse works. If the total cost exceeds the caster's rank, they are overloading the spell group (see above); subtract the caster's rank in the group from the total cost of the spell and add 6 to find the number or more to be rolled on **2d6**.

Tolfirion wishes to finesse two parameters of a 2 EU spell. The total cost is 4 EU (2+1+1=4), but the caster has only bought up to the second spell. He therefore is overloading the spell group and must roll 8 or more (4-2+6=8) on 2d6 for the finessed spell to work. If the roll is 7 or less, check the Overload Table for the result.

If the caster finds they lack the required units to meet the total cost (pay attention to the costs and your adventurer's current unit totals!), the spell never gets started and the caster loses all remaining units.

Malvern has bought up to the fourth rank in a spell group and wishes to finesse two parameters of a 2 EU spell. The total cost is 4 EU, but he only has 2 EU left. The spell fizzles and the caster loses his remaining 2 EU, unless he stresses his PWR to gain EU.

## 2.13.9 Limitations on Finessing

How much may a spell be altered before it, in essence, becomes a new spell effect that must be researched? No spell, or single parameter of a spell, may be finessed more than 4 times. This could be 1 parameter 4 times, 2 parameters twice, 2 parameters once and 1 parameter twice, etc. Each spell description shows which parameters may be finessed and the change per finesse.

For example, an adventurer wishes to increase the range of a spell by 2 steps, the duration by 1 step. This is a total of 3 finesses and is possible. If they wished to increase the range twice and the duration twice, it would be possible, as well. But if they wanted to increase the range 3 times and the duration 3 times that is a total of 6 finesses and is beyond the capabilities of the spell.

## 2.13.10 Finessing and Overloading

This is possible, but obviously very chancy. This occurs when the adventurer wants to cast a spell above their rank in a group, and finesses it. The deleterious effects of lacking the basic spell ability and finesse ability are additive.

For example, a caster wishes to alter a fifth ranked spell so that it is 2 steps smaller but does the same damage as the normal spell. The finesse cost for this would be 4 EU (reduce the area twice (2 EU) and increase the damage twice (2 EU). This is a total of 4 finesses (within the limit) and 9 EU (5+2+2=9). But the caster only has rank 4 in this group. The total cost for this spell exceeds the caster's rank by 5. They must roll 11 or more on 2d6 (9-4+6=11) for the finessed spell to succeed; if they roll 10 or less, check the Overload Table for the grizzly results.

### 2.13.11 Powerful Spells

Casting any spell with a base rank (before finesses) of 12 or more causes the caster to lose one rank in that spell group. The only way to recover this rank is to purchase the rank back with experience points, just as it was originally bought.

## 2.14 Targeting

Targeting is the directing of magical spell energy, and is as important as the spell itself. There are seven **targeting methods** which determine what is the spell target. Some affect an object, entitling that object to a resistance check to reduce or eliminate the spell effect. Other methods affect an area and are always successful. Each spell description lists the targeting method for that spell.

#### 2.14.1 Caster

**Target: caster** Spells which specify **caster** as a target can only affect the person or creature casting the spell.

#### 2.14.2 Touch

**Target: touch** Spells labeled touch require the caster to actually touch the intended target. Only a single object, person, or creature can be affected by this type of spell. If cast during combat at a mobile target, the caster must successfully "strike" the target to deliver the spell. If the caster attempts to strike and fails, the spell is never cast and the spell energy is not expended. If the target is an unwilling person or creature, or any object, it is entitled to a resistance check against the spell if one is listed.

### 2.14.3 Multitouch

**Target:** multitouch While a spell labeled MultiTouch is being cast, the caster touches each target they want to affect, during the rounds used to cast the spell. Thus a spell with a target of MultiTouch, which takes three rounds to cast, indicates the caster touches as many targets as they can (or wish) to in those three rounds, and when the casting time is complete, all those touched are affected. If the targets are unwilling persons or creatures, or any objects, they are entitled to a resistance check against the spell if one is listed.

## 2.14.4 **Hearing**

Target: Hearing This targeting method involves an audible casting magic, which affects any creatures or persons capable of hearing it. In a large, open area with no other sounds, creatures or people within a distance of 240 feet of the caster can be affected. Other sound, wind, and obstructions may modify this distance, as adjudicated by the GM. Simply covering the ears does not stop the sound! The targets must have effective earplugs, which stop all other noises as well, to avoid being affected by the spell. If the targets are unwilling persons or creatures, they are entitled to a resistance check against the spell if one is listed.

#### 2.14.5 Memorized Location

Target: MemLoc This targeting method is generally used for spells which move the caster or an object to a distanct place, or let the caster scry or communicate at a distance. To memorize a location the player must state that their adventurer is specifically memorizing a location. The adventurer must spend at least 10 minutes to complete the memorization, and may not memorize more locations than their INT attribute. The adventurer can only remember the fine details needed to target to the memorized location for a period of four weeks. Since there is no target object, no resistance checks are needed for these spells.

#### 2.14.6 Direction/Distance

Target: 100 + 50/F' Spells using this method contain only a distance in the Target: field. The caster specifies the direction the spell is to travel, and the distance at which it will activate. The spell then travels in that direction and activates at the stated distance, or at the first intervening object in the indicated direction. Since there is no intended target object, there is no resistance check which could prevent the spell from activating. However, there may be a resistance check against the spell effect.

## 2.14.7 Line of Sight

Target: LOS 20 + 10/F' LOS stands for Line of Sight.

These spells are cast at an object. The object must be within the listed distance, and there must be an unobstructed, straight path from the caster to the object. The distance limitation is based on the details needed for the caster to successfully target the spell. Any intervening objects, glass, water, opaque gases, or darkness prevent these spells from succeeding. LOS spells may not be cast through scrying spells unless the spell specifically states otherwise.

These spells can be banked off of well-formed mirrors and other optics, but will malfunction in strange ways (GM's discretion) if banked off flawed surfaces. Spells which affect vision also affect the ability to cast LOS spells. For example, **Long Eyes** increases LOS spell ranges proportionally. Heat Vision allows LOS spells to function in the dark. There are no resistance checks against the activation of these spells, but any listed RC applies to the resulting spell effect.

#### 2.15 Areas of Effect

As well as understanding how to target a spell, you also need to know how to define what is affected by the spell. In general, spells affect areas, objects, or groups of objects.

Let's deal with areas first. An area is defined by giving a specific size to the spell effect. If the effect is meant to occur to objects within the area, then every object within it is entitled to the resistance check listed in the spell description. If the area itself is to be affected, there is no resistance check. Areas can be expressed as:

2.16. OBJECTS 31

#### 2.15.1 Radius

Area: 10' radius This affects a spherically-shaped area with a radius of 10 feet from the point at which the spell is targeted. Intervening objects within the area may partially or fully shield other objects from the spell effect (GM's discretion). Once the spell is activated, the GM may use normal laws of physics to determine how the effect acts, if it's a physical effect.

#### 2.15.2 Volume

**Area: 100 cubic'** This spell affects a particular volume, whose shape is specified by the caster. No single dimension of this volume may by more than four times larger than any other dimension. All objects within the volume can be affected by the spell, and resistance checks may be listed, if appropriate.

#### 2.15.3 Cone

Area: 10 x 30' cone This spell affects a conical area 30 feet long with a 10 foot diameter base. The point of the cone is at the caster's fingertip. Intervening objects within the area may partially or fully shield other objects from the spell effect (GM's discretion). Once the spell is activated, the GM may use normal laws of physics to determine how the effect acts, if it's physical in nature.

#### 2.15.4 Line

Area: 5 x 20' line This area of effect is defined by drawing a line from the caster's finger tip 20 feet toward the spell target. All objects 2.5 feet on either side of this line (5 feet total distance) can be affected by the spell. Intervening objects within the area may partially or fully shield other objects from the spell effect (GM's discretion). Once the spell is activated, the GM may use normal laws of physics to determine how the effect acts, if it's physical in nature.

## 2.16 Objects

An object is a person, a creature or a thing. When a spell affects an object, further restrictions limit what kind or type of object can be affected by the spell.

**Area: caster** This limits the spell effect to the caster.

**Area: single creature** This limits the target of the spell to one living creature or person.

Area: single marine creature This type of area further restricts the target to a creature which primarily lives beneath the sea. Many other restrictions, such as living, dead, humanoid or non-intelligent, can be applied in this way.

**Area: single plant** Yes, plants can be affected by some spells as well.

**Area: 130 lb** This limits the spell effect to a single object of no more than 130 pounds.

**Area: 3' radius** This limits the spell to affecting that portion of an object which is within three feet of the target

point of the spell.

**Area: ferromagnetic object** The target of this spell is only effected if it can be magnetized. Other classifications, such as **transparent**, **non-metallic**, **frozen** or **red** can be used in this way.

## 2.17 Groups of Objects

Often a group of several objects can and will be considered as a single object. If all the objects in the group fit within the limits and restrictions of the spell being cast, and they are all physically touching, the spell will affect the group of objects as though they are one.

An adventurer, their clothes, backpack, and enclosed objects within the backpack, is considered a single object. A wall, with all of its boards, nails, enclosed wiring, and paint is considered a single object. A brick wall, with bricks and mortar is considered a single object. A ship's hull, with its enclosed superstructure, decking and rigging is considered a single object. A group of more than one persons, creatures, or plants is not considered a single object.

In short, anything constructed as a permanent structure, and any creature carrying non-living objects, are considered as a single object when examining the area of effect of spells.

## 2.18 Incants

Unlike spells, incants involve the release of **Spiritual Energy** or **Life Force**. The power behind incantations is that of the spirits of the **Kurago**, but the incantor uses his own life energy to perform the ritual to create the conduit to the Kurago. This conduit is then used to channel the spiritual energy, concentrating it in a mixture, talisman, song, imprint or invocation.

The nature of incants is such that they many may not show their power or effect immediately. The magic is concentrated in some physical form and remains quiescent until activated by drinking, breaking, or brandishing it appropriately.

## 2.18.1 Preparing Incants

To prepare an incant your adventurer performs a Ritual. Each ritual requires life force to be expended by your adventurer equal to the rank of the incant. Make sure you have gathered any needed ingredients, and have any needed props at hand for the particular incant. Tell your GM which ritual your adventurer is about to perform. Spend the time listed preparing, using the method in the incant description. With the preparation ready, your adventurer speaks or sings the ritual, manifesting the results of the incant. Subtract the incant rank from your live force total.

#### 2.18.2 Life Force and Death

All adventurers have a **Life Force** equal to the total of their **HEA** and **PER** stats. Nomads use this life force to open a conduit to the **Kurago** to channel the energies of the spirits

within. If a nomad's life force drops below 1, their body expires, and the nomad's spirit travels to the Kurago, mergin with their **Guardian Spirit**. The attempted ritual does complete, but the results may or may not be useful depending on the type of incantation.

Life force is regained by the nomad at a rate of (**HEA** + **PER**) divided by 5, rounded down. The life force total never exceeds the sum of these two stats.

## 2.18.3 Restrictions on Preparing Incants

Incants may not be prepared under duress. The incantor must be calm and in firm control to complete the preparation without error. The incantor must not be under the influence of any mind-controlling spell or drug. If the incantor is interrupted while mixing, speaking or singing, the ritual must be redone from the beginning.

## 2.18.4 Stressing Health for Incants

An adventurer may sacrifice 1 point of **HEA** while preparing an incant to increase its rank by 2. This may done only once per day, and it does not count as an action. The caster can only effect the single ritual they are currently performing. The cost to replace a point of Health is quite high, so this is not an action to be taken lightly.

### 2.18.5 Performing Songs

Some incants are performed as songs, or songs with dancing. More than one nomad can conduct such an incant at the same time. While multiple incantors will not increase the effect of such a ceremony, it will multiple the number of resistance checks needed to resist. If the target of such an incant must make a 4d6 RC vs WIL to resist, with three nomads singing, the target must make three RCs to resist the effects. Musicians accompanying the incantor assist in their concentration making it harder for external distractions to interrupt the ritual.

## 2.19 Intervention of the Deities

Gods and goddesses are much like humans in their likes and dislikes. They enjoy heroism and abhor cowardice. They live to be worshiped, reward their faithful followers, and punish wrongdoers. Manipulating the creatures of their world is both a pleasure and a duty.

When your adventurer seems to be up against impossible odds, or when death is imminent, they may call upon a deity for aid. To try this, announce your adventurer is calling for divine aid, roll **3d6**, and call out the name of a deity. If all three dice come up as **ones or twos**, the deity may intervene.

A call for **Divine Intervention** (**DI**) may be made during your action phase whenever your adventurer is conscious. Also, at the time of death, one call may be made after the GM announces your adventure's demise in the result phase of your round. If you forget to name a deity when making the roll, the GM will choose a random deity who may respond. The GM may allow priests to stress their **CSE**, allowing them extra dice in their attempt to roll 3 ones or twos.

A result of **three sixes** automatically signals the deity's immense displeasure at being disturbed, and results in the instant and irrevocable death of the adventurer, usually at the end of an enormous bolt of lightning. If your adventurer is granted extra dice for a divine intervention call, while the first three must be rolled, you may stop at any point past them to avoid such a fate.

Repeated, spurious calls to the gods do little but annoy them. Each time they do not respond to your adventurer's call, and they survive without their aid, they will be less inclined to be helpful in the future. They recognize and appreciate those who survive and flourish on their own talents and abilities.

### 2.20 Between Adventures

Your adventurer does not disappear from existence at the end of an adventure, and then reappear at the beginning of the next. While there are many things he may do which are of little consequence to the ongoing adventures, your GM may allow you to specify some of their actions between adventures. Here are a few of the activities in which he may be involved.

## 2.20.1 Employment: Getting a Job

There are many opportunities for using your adventurer's skills in the employ of some shop, business or nobleman. You may pick one such skill to consider as your adventurer's Profession. You adventurer earns silver in this employment which both pays their living expenses and provides them some extra cash. Only skills that make sense as a profession can be chosen (GM's choice). To be hired to a position, using a skill, that skill must first be bought to a rank high enough to be profitable, 7 is considered the minimum. For each game week between adventures, the adventurer profits silver pieces equal to the base cost of the skill, divided by ten, times the adventurer's rank in that skill.

## 2.20.2 Being Your Own Boss

With a sufficient amount of capital, you can buy the property and equipment to become your own boss, running a business. Pick a skill which your adventurer has at rank 9 or higher and ask your GM the cost of setting up a storefront, shop or warehouse. If you can meet or exceed that amount, and they determine there is space available, and a market for your product or service, you may invest silver to establish this business.

The GM will then roll 1d6 to find out how many months your adventurer will have to spend out of play to acquire land, outfit or build the building, purchase stock or supplies and hire and train employees. Once you are in business, you normally earn 1/20 of your original investment back each game month with no further attention on your part. You may invest additional silver at any time, raising the earnings and worth of your business. If at any time after you have started, you decide to disband your business, you may recover up to one half of your total investment.

The economy of the village, town or city you are based in

may change. The GM may alter your earnings to reflect times of boom, or economic hardship. Also, the GM can base adventures around your business and its employees.

## 2.21 Extended Leave from Adventuring

If you want to take an adventurer out of play for an extended period, inform your GM and he will place your adventure out of play, and record the current game date on your adventurer card. You can do this to allow your adventurer to take a long trip, to recover from too much action, to enter an institution of learning or to join a monastery or temple. Your adventurer will earn 1d6 times 100 experience points per game month they are out of play. You can apply this to any attributes as you feel appropriate for the activities the adventurer pursued while out of play.

For example, if Yazin, a warrior, suddenly acquired religion and decided to present himself at the Solarium to the priests of Ra, if he is accepted, he informs the GM that he is out of play. The GM records the game date that this occurred. If the GM then determines that Yazin spends 10 months inside the Solarium until his **Day of Awakening**, Yazin's player would roll 10d6. If the total was 37, Yazin would receive 3,700 experience points, which he probably should spend on divine magic (which is, of course, triple cost because Yazin has a warrior's background).

## **2.22** Aging

Very successful adventures may live to a ripe old age, but eventually Time catches up with everyone. To find out when your adventurer could pass on from natural causes, add the numbers on the table below for each of their four grandparents.

A full human's **Minimum Life Span** is 60 (4 x 15). A half-human,

Min Life Span

Race Years
Orc 10
Human 15
Lizard 20
Dwarf 35
Elf 50

half-elf's minimum life span would be  $2 \times 15 + 2 \times 50 = 130$  years. A check needs to be made on each of your character's birthdays past their minimum life span. To make the check, subtract your adventurer's minimum life span from their age. Then roll the die shown on the next table for each grandparent and total the results. If it is less than the difference in ages, your character has passed on due to natural causes.

Feldnor is one quarter dwarf and three quarters human (minimum life span is 35 + 3 x 15 = 80 years). Suppose he has reached his 95th birthday. He must roll 15 or more (95 - 80) on 3d6 (human grandparents) + 1d10 (dwarf grandparent) to avoid death from old age.

Aging Die		
Race	Die	
Orc	d4	
Human	d6	
Lizard	d8	
Dwarf	d10	
Elf	d20	

This check is made once a year for convenience. This means that your adventurer's death is not always a sudden, catastrophic event that might have been prevented. The only way to preserve your adventurer's life is to use magic or some other means to physically

reduce their age, or to allow them to live after death (as in the undead). Your adventurer is entitled to a divine intervention call when they die in this way.

## 2.23 Diseases

Adventures encounter many strange places and are subjected to a lot of questionable health risks. Here is a list of some of the more common Jaernian diseases and illnesses and their effects:

**Granjuke** Transmitted from person to person by close and prolonged bodily contact, this disease manifests itself as a rash on the skin. The affected area becomes inflamed and the victim has an intense desire to itch. This helps spread the disease to other areas of the body. Each day the afflicted must make a **4d6** check vs **WIL** or lose **1 DP** from damage of the infected area.

While not usually fatal, this is a very annoying condition. It is normally treated with an extract of the **Horust** tree being spread on the afflicted areas just prior to a long soak in hot waters. This treatment will, over the course of 4 to 6 days, force the disease into a dormant state. However, heavy stress or physical activity can cause a reoccurance at a later date.

**Maldormi** Believed to be caused by a fungus which grows on overripe fruits, this illness robs its victim of the ability to sleep. As tired as the victim gets, their body is unable to fall into unconsciousness unless injured, and even then, none of the normal healing and recuperative effects of sleep occur. Eventually, this results in death. Each day this illness robs its victim of **1d8 DP**, causing them to grow more tired, irritable and confused. When the victim reaches zero DP, they die.

The priestesses of Isis sedate victims of maldormi with herbal mixtures to calm and dull their senses and minds, and restrain them to help them conserve their dwindling reserves. Each day of this treatment, the victim may attempt a **5d6** check vs **HEA**. If successful, they break the disease, and falls into a normal sleep. Upon waking, they are functional, but needs to heal up to full normally.

Malibro Leading healers are in disagreement as to the cause of this malady, but its symptoms are very recognizable. When its victim has been at sea for some great length of time, a sudden inability to hold his balance causes him to be unable to stand, walk or even sit. The surface below him seems to be swinging and spinning wildly. The constant movement makes it difficult for the victim to concentrate, speak coherently, or perform any task. The victim must make a 6d6 check vs WIL to take any voluntary action, or make a 5d6 check vs WIL to talk coherently for up to a minute.

The best treatment for such an individual is to restrain them in a bunk to keep them from injuring themselves, and then setting course for the nearest land. Once on land, the victim slowly comes back to normal over the next two to four days. Roll **3d6** vs **HEA** after 24 hours of rest to return to normal. The disease is never actually cured, and will

remanifest itself within one to two hours if its unfortunate victim sets foot on any floating or flying vessel.

Putrihaut Caused by a fungus which normally grows on certain underground mushrooms, this disease causes the skin to dry, flake and fall off. This process occurs faster than the body can regenerate new layers of skin. About a week after this is first notices, layers of muscle tissue are exposed. This leads to blood loss and a lot of pain. Victims will tightly wrap their exposed muscle in oil cloth to try to prevent blood loss. Each day from the third on, the victim looses 1d8 DP and must make an RC of 4d6 vs WIL to perform any voluntary actions while in great pain.

**Siritmenso** The origin and transmission method of this disease are still unknown, but its symptoms are devastating. It attacks the brain, forcing it to use more and more of its reasoning power to combat the effects of the disease. This manifests itself first as short dropouts, where the victim stops moving, and is unaware of the passage of time. These can be as short as a few seconds, but get longer as the disease progresses until the victim never comes out of this state again.

In any new situation, scene or location (GM's discretion), the player rolls 1d6 vs WIL for each week they have been infected. If this RC vs WIL fails, they have a dropout of 1 round times the product of the dice of his roll (ie if the player rolls 2d6 and gets a 4 and a 3, they lose 12 rounds). At the end of this time, they must succeed at this roll to come out of the dropout. While not in a mindless state, the victim can be aware that the dropouts are occurring by the sudden shifts occurring around them. This gets more pronounced and frantic as the dropouts increase, until near the end, time seems to be rushing to a final end. This is extremely frightening.

Sondikapto An inherited condition, the unfortunate victim goes into a violent seizure triggered by the combination and sequence of certain tones. This seizure can last up to five minutes, during which the victim is likely to injure themselves. When triggered, make a 5d6 check vs HEA or suffer 1d10 DP damage.

Many troubadours have studied this condition in depth, and have categorized the kinds of sounds leading to these seizures. They avoid these combinations in their music. Some of the more knowledgeable nomads have discovered other sequences of sound which can bring the victim out of the seizure quickly, before they damages themselves.

Sorcofin This can only effect those who cast magic, either divine or elemental. This airborne spore enters the body and attaches itself to the mucous membranes of the nose, mouth and throat. There it begins to grow, using any existing magical energy on which to feed. Quickly it victim looses any accumulated spell energies and any regenerated energy is fed on by the spores.

These spores are most often found in humid dark regions rich in magical energies. These spores will feed for four to eight weeks until they reach a magical saturation level and reproduce, leaving the current host behind. The only known

method of treating this infection involves the use of the metal Terisium to create an area completely devoid of magic. The spores will die within four hours in such an area.

Steliforto This disease affects all muscle tissue in its victim. It lodges within the muscles, and feeds of the energy and nutrients which would have operated the muscles. Its symptoms start with a weakening of the limbs, and progress in two days to a difficulty in walking. At four days the victim can no longer walk and can barely use their arms. At six they are unable to make any voluntary movement, and generally at eight days their heart stops beating and they die. Effectively, the unfortunate adventurer afflicted with this loses 2 pts of STR each day.

Treated carefully by informed and well equipped priests of **Isis**, this disease can be halted and it effects slowly reserved in one half of most cases if they are caught while the victim can still walk. The earlier it is treated, the better the chances of living and eventual recovery. STR will recover at 1 point for every two days of rest after being cured.

Vortoperdi
This very unusual and rare disease can only affect those of human stock, and mostly just those with red hair. When afflicted, the victim loses the ability to associate words with ideas, objects and places. This process takes about a day, and after this, they can not communicate verbally or telepathically with anyone else. The only known method of treating this disease involves magically removing all knowledge of language from the victim's brain, and then reteaching it language, from the ground up. The scrambled brain pathways relearn speech, and eventually the victim can communicate once again.

# **Chapter 3**

# Life on the High Seas

A very mature planet, the land masses of Jaern have been slowly eroded away, leaving most of its surface covered in a relatively shallow ocean. Thousands of small islands poke above the surface, leading to a proliferation of very diverse biologies and cultures. The ocean itself has a very low salt content and is home to the majority of Jaernian life. Humans and their kin ply the surface of the ocean with a plethora of different vessels, traveling from island to island, or even living at sea.

#### 3.1 Ocean Creatures

#### 3.1.1 Fish

The variety of fish swimming the seas of Jaern seems endless. Cold blooded, finned, spined, colored, poisonous and not, there is no end to their sizes shapes and appearances. Fish form the diet staple of most people, and employment for over one fifth of all humanoids in their harvesting. Dangerous fish include vicious **sarko**, and the very poisonous **quezl**.

#### 3.1.2 Coelenterates

Almost as numerous as all the other life in the seas, Jaern supports a bewildering variety of these creatures. Small **Atomo**, each less than a hundredth of an inch in size, form the food for most of the grazing fish . Larger jellyfish in myriads of colors float in the top twenty feet of the water, slowly converting light to food by different chemical processes. The largest of these creatures, the **Flugofiso** can grow up to 60 feet in radius, and generate gases that allow it to escape the waters and float high in the air. Many superstitions surround the sighting of these strange coelenterates.

### 3.1.3 Dolphins

These creatures have evolved into highly intelligent creatures. Because of their environment and lack of manipulative limbs they are not tool builders, however they have developed a diverse and complex culture.

Physically they are very similar to Earth's dolphins, they differ in a few important ways. A dorsal stripe of color, blue for females, and yellow for males, assists in their communications by changing shade subtly, indicating general mood and inclinations. A slightly larger skull is protected by thicker bone and fleshy bumps which protect the dolphin's brain from blows and the extreme temperature

found in ocean currents. A larger tail fin and a more sleek body allow these creatures to move through waters at speeds approaching 40 mets per hour (15 MPH or 24 KPH). The life expectancy of these dolphins average from 30 to 40 years.

Dolphins communicate with each other in a highly developed language consisting of whistles, clicks and guttural stops. Some of these are outside the range of human (but not lizard) hearing. The re language itself is weak in complex verbs and time based tenses, but very extensive in descriptive terms describing water and the objects found in the oceans. Some humans can, after extensive training, understand and speak some of this speech, but the dolphin must make a conscious effort to slow its speaking speed.

Forming small groups of 8 to 16 based around social needs and friendship, dolphins are rarely seen alone. They will pair once, making a lifetime commitment to a mate. If they are capable, each pair will bear young live, in pairs and triples, once every 5-10 years. These young are raised by the group until they are old enough to interact with others close to their age, at which time they leave and form new groups.

The dolphins consider Jaern their world, and land based creatures as strange aliens. Generally they do not concern themselves with events on land, however they will relentlessly hunt down those who damage or poison the seas and those whom would capture and enslave dolphins for their own ends. The dolphins will seek a way to punish these humans for these crimes. As for others living beneath the sea, dolphins live in peace with lizardkind, and while they can not ordinarily communicate well, will often be seen in lizard's company.

Occasionally, a young dolphin will meet one outside their own race and form a friendship. If the other wins the dolphin's trust and affection, the dolphin may decide to pair

outside their race. This kind of relationship remains one of emotion and friendship. Maraujos often seek out places where many young dolphins swim, looking to find those whom would pair with its youngest marines. The dolphins and the marines, over time, have learned the benefits of such a pairing, which has resulted in the dolphins tolerating the nearby presence of these humans.

Once paired in this way, the dolphin will expect nearly daily attention from his partner. In return, he will devote his time, energies and abilities to help his partner. Over time, the two develop an almost telepathic sense of the other's needs and desires. Many dolphins, and dolphineers have sacrificed even their own lives to help save their partner from harm.

#### 3.1.4 Lizards

Evolved in the deeps of the oceans, these intelligent creatures group together forming gatherings. They communicate verbally and sense objects and motion mainly via sound, which travels well under water. Finding dry land uncomfortable, they largely avoid interacting with the humans and humanoids above the water.

## 3.1.5 Balenoigajos

Mammalian creatures of large size, these herbivorous sea dwellers subsist on Atomo strained through their bodies as they swim. While it is very profitable to hunt and slay these creatures for their meat and other body products, this profession has been virtually eliminated by the Onivero whom consider these creatures close friends and allies.

#### 3.1.6 Oorn

Evolved from land trees, these plants grow branches along the water's surface and thrust large leafy growths upward toward the light. A single floater can reach sizes of up to a few hundred feet in length. Posing a navigational hazard to ships, standard shipping lanes in the southern waters that the Oorn usually grow, are regularly swept clean of these plants. Especially large Oorn are sometimes used as the base of small villages inhabited by the Onivero, or by some nomads whom have emulated them.

## 3.2 Oceangoing Vessels

The seas of Jaern are plied by innumerable vessels of many different sizes. Ocean going transportation ranges from that for the single person, to entire ocean dwelling communities.

#### 3.2.1 Sail Boards

Only suitable for short journeys between nearby islands, these boards are about 6 feet long and 2 foot wide. In the center, 2 feet from the front is a socket which excepts a 7 foot tall mast, bearing a single cross spur and a triangular sail, 6 foot wide at the base, coming to a point at the top of the mast. The user of this device stands behind the sail and holds the cross spur at the proper angle to catch the waves. They use their body to steer the board.

This very active and athletic way of travel restricts the journey time to about two to three hours for even the most

ambitious athlete. At a speed of up to 10 mets/hour (4 MPH or 6 KPH), this restricts the normal range of this device to 30 mets (11 Mi or 18 KM).

Marines, trained in sailboarding, will use sailboards as a last resort when their **Maraujo** has sunk. Carrying several days food, they can often go up to a week, traveling 20-40 mets a day (7.5 Mi or 12 KM), to attempt to find a place to land. Navigating while using a sailboard is particularly difficult since they will only keep a course when they are held steady by their riders. Sailboards without a mast and sail are called **Surfboards** and are often used by marines to land during amphibious assaults. A maraujo will sit just over the horizon from its target, and its dolphineers will ride these surfboards to shore to catch their target by surprise. Then the maraujo will close and disgorge attack boats to pick up the marines after the assault.

## 3.2.2 Dolphins

Dolphins will rarely concede to being used like steeds by humanoids. Normally only dolphineers and a few scattered nomads spend enough time at sea to have an opportunity to meet and pair with a dolphin. Even these people must treat their dolphin as a partner rather than a mount.

While riding a dolphin, the human lies above the dolphin and wraps their arms and legs around the dolphin. Since their arms will rarely reach, they will hold on to a length of leather in each hand, or tied about their wrists. Dolphineers will often have a suitable leather thong attached to their maroglave for this purpose. As the dolphin swims, the rider must match their body movements to the flexing of the dolphin as its tail and back arc up and down. A dolphin and rider traveling like this can achieve speeds approaching 35 mets per hour (13.25 mi or 21.33km). Dolphins have good senses about currents, depths, and direction. They will be able to find land with little effort.

More barbaric and oppressive riders have been known to use a leather harness on the dolphin. Such a rider places their feet in the stirrups and attached their harness to the dolphin's. Such a harness is uncomfortable for the dolphin and will injure it in time.

#### 3.2.3 Skiffs

These small boats are generally about ten to twelve feet long and 3 to 4 feet wide. They are generally constructed of wood planking and have a rudder operated manually at the rear. A mast with a single spur sports a 10 foot high triangular sail. A skiff can generally hold 6 to 8 people and can travel at speeds of ten mets per hour under sail, or 4 mets per hour rowed. Skiffs are generally used for line of sight travel between nearby islands, and as auxiliary craft aboard larger crafts. The handle only relatively calm seas and will swamp easily with waves larger than a couple of feet tall.

#### 3.2.4 Attack Boats

Larger than skiffs, these boats are generally 25 to 30 feet long, 8 to 10 feet wide, and hold up to 30 men. These boats are generally constructed of wood planking, pegged to

form, and covered in many layers of a heavy shellack to waterseal and reduce friction. With no mast, they are driven by six sets of oars mounted midship. At capacity, these boats can be rowed at speeds of up to 8 mets per hour. They are generally used by larger vessels to aid in debarking and boarding. A Maraujo will often have up to four of these to transport non dolphin riding warriors. Merchant vessels will use these boats as life boats, and to land in places not equipped with a proper dock.

#### **3.2.5** Kurujo

Us ed mainly as couriers and light cargo and passengers, these vessels are generally 35 to 50 feet long and displace 3,000 to 6,000 tons. With a crew of 10 to 20 sailors, they can carry a few passengers, or a limited amount of cargo. Two masts hoist large triangular sails, with a few smaller sails for maneuverability. An unladen Kurujo can travel at speeds of up to 15 mets per hour.

#### 3.2.6 Metioujo

These wooden vessels are deep sea ships capable of traveling long distances with large cargos. Used generally by merchants, these carry the majority of traffic at sea. Metioujo are sail driven, and are normally armed to ward off attacks by privateers. A metioujo's displacement varies from 10,000 to 20,000 tons, and their length from 80 to 120 feet. Width, at the center, is usually one third of the vessel's length. There is normally a large cargo deck accessible from one or more cargo hatches on the main deck. Above the cargo deck is the crew deck, containing quarters for the crew, storage for food and operating equipment, and the crew's mess. Above this is the main deck, open to the sea in the middle. At the front of the ship is the forecastle, housing the officer's quarters. At the rear is the afte astle, c ont ai nin g the ch ar t ro om a nd th e weapons locker. Above the aftcastle is the pilot's deck, where the rudder wheel is manned, and the aft ballista is usually located. Above the forecastle is the cefo's deck, from where the ship is normally commanded, and the fore ballista or catapult is manned. Three masts carry a variety of square and triangular sails, and a crows nest tops the center mast. An intricate webbing of rigging allows the ship's rigger's to control the trim of the sails. The sails allow these vessels to traval as fast as 12 mets per hour. Mounted at the port and starboard rails at center ship, two to four skiffs serve as lifeboats in emergencies.

#### 3.2.7 Maraujo

T hese ar e the ve s s e ls in h abit e d by g ro up s o f M ar ines. S imi la r t o me tiouj os, t hese shi ps ar e us uall y narrower, lighter and faster than their mercantile counterparts. Like the Kurujo, these vessels can traval as fast as 15 mets per hour. Much of what would be cargo space in a metioujo is used in the Maraujo for supply storage, ammunition storage and dolphin tanks. Usually sporting two or three large ship to ship weapons on the deck, Maraujos are rigged for speed and maneuverability. Two attack boats can be lowered from their stowage position near the rear of the ship. Boarding ramps are

hinged into the port and starboard decking. A 30' lo ng and 10' wide tan k at t he v ery keel allows the ships compliment of dolphins to ride within the maraujo. A waterlock with two interlocked doors, slightly left of the keel, allows the dolphins access to the ocean. A third safety door can be lowered from ropes at three places on the ship, protecting the ship against sinking should the waterlock be damaged. Closing this safety door also protects the ship against boarders during a battle. Crew s of t hese ves sels are p r oud, well tra ined warriors whom are honer bound to protect their crewmates, and their ship. Most marines will skuttle their maraujo rather than let it fall into enemy hands. More information about these marines can be found in chapter 10: Marines for Hire.

#### 3.2.8 Onivero Skim Boats

Built and crewed by the Onivero, these small boats are very unique. Only about 50' long and 10' wide, these boats have four masts using over one hundred and eighty sails. At first, the rigging seams inhabited by hoards of small sea creatures, but on closer examination it appears that the creatures ARE the rigging! The onivero communicate with them telepathically, and together they control the skim boat. One or more groups of dolphins also travel with each skim boat. Two hydrofoils are attached to the hull, a few feet under the waterline at each side. When the skim boat is in the open water, the dolphins form a bow wave, pulling the ship, and the sails delicately take best advantage of each gust of wind, speeding the skim boat forward. At a crucial speed, the boat I ea ps abov e the water, r i sin g on i ts hydrofo ils, and increases speed to 80 to 150 mets per hour. Once skimming, the dolphins no longer need to pull it forward, and simply trail the boat, catching up to it as they can. The Onivero will rarely allow others on board, as they have little space, and little patients for humans.

#### 3.2.9 Platforms

Land is a rare commodity. With the largest and most farmable isles being well popu I ated in recent times, many people have turned to living off of some of the smaller and less desirable lands. In the last century, a new kind of migratory farmer has emerged. Rather than being tied to one plot, he has taken his entire household, established it on a large barge like raft, and moves from isle to isle. Tending different crops with different growing seasons, he maximizes his ability to produce foodstuffs. At first small gr ou ps of these farm ers band ed together, lashing their barges to each other, and traveling, en masse, from one site to another. As these groups grew, they star ted ne ed ing sp eci alized se r vices, p eople t o bu ild and service tools, people to process the raw crops, merchants and traders to sell the results to others. Eventually these grew into entire towns and cities. Today many of these cities lay claim to a number of home sites, traveling from one to another as the growing season progresses.

#### 3.3 Building and Buying Ships

- 3.3.1 Design
- 3.3.2 Dry Dock Fees
- 3.3.3 Workers
- 3.3.4 The Hull
- 3.3.5 Masts
- 3.3.6 Rowing Deck
